香港教育大學
The Education University of Hong Kong

Founded in 1994 and awarded the University title in 2016, The Education University of Hong Kong (EdUHK) is a publicly funded university, dedicated to the advancement of teacher education and related disciplines through a diverse offering of academic, professional and research programmes. The University aspires to become a leading university in the Asia Pacific region and beyond, with a focus on educational and multidisciplinary research, development and innovation. We are committed to nurturing outstanding and caring educators and professionals as well as enhancing the impact of scholarship.

The University has an academic/teaching staff strength of about 460 and total student headcount of about 11,000. It has a Graduate School and three Faculties, namely, Faculty of Education and Human Development, Faculty of Humanities, and Faculty of Liberal Arts and Social Sciences, comprising 14 academic departments, as well as two Academies, Academy for Educational Development and Innovation and Academy for Applied Policy Studies and Education Futures, a number of University-level research centres and Faculty-level research and professional development centres. For more information about the University, please visit http://www.eduhk.hk.

To continue pursuing excellence in the advancement of knowledge, scholarship and innovation through high quality research, we are seeking enthusiastic and highly dedicated academics to join the University in support of its strategic development in diverse areas.

Associate Professor / Assistant Professor / Research Assistant Professor - Electronic Engineering and Intelligent Systems (Ref: 2601008)
Department of Science and Environmental Studies
Faculty of Liberal Arts and Social Sciences

Department of Science and Environmental Studies (SES) is committed to advancing excellence in science education and environmental sustainability through innovative education, achieved by rigorous, interdisciplinary academic programs that integrate theory with real-world application. The department equips pre-service and in-service science teachers to become future-ready educators with the essential knowledge, pedagogical skills and professional attitudes. The Department is also committed to delivering undergraduate and postgraduate programmes across diverse disciplines, including science education. Environmental science and management, and sustainable development to meet society's evolving needs.

The Department is seeking an inspirational and energetic candidate with substantial industry experience to join the University in support of its development in the areas of **Electronic Engineering and Intelligent Systems**.

The successful applicant will join the University's highly qualified scholarly team and affiliate with the relevant academic department. The appointee will contribute to strengthening the University's research capacity, knowledge transfer and industry engagement. Responsibilities mainly include: (i) conducting high-quality research and applied R&D, securing external and industry funding, and generating scholarly or technological outputs; (ii) developing collaborations with industry and academic partners, including knowledge transfer, consultancy, technology development or deployment, and translational projects; (iii) contributing to programme and curriculum development and bringing current industrial practice into teaching; (iv) leading research and applied projects with colleagues, RPg students and external partners; and (v) participating actively in the University's community.

Applicants should normally hold a doctoral degree in a relevant field. The search is particularly aimed at candidates with **substantial industry or industry-linked R&D experience and a strong record of practical and professional achievement**. Relevant areas of expertise may include electronic circuits and systems; sensors and embedded systems; radio-frequency (RF) systems and wireless communications; Internet of Things (IoT) and intelligent infrastructure; microelectronics and VLSI design; signal processing; or closely related areas of electronic engineering. Particular value will be placed on demonstrated achievements in knowledge transfer and in translating technical expertise into practical applications, including product or system development, technology deployment, patents or licensing, commercialisation, consultancy, and strategic industry partnerships. Exceptional candidates without a doctoral degree may also be considered where they can demonstrate substantial senior-level industry experience and a distinguished record of relevant professional achievement, subject to the University's appointment requirements. Academics with substantial industrial experience and sustained engagement with industry are equally welcome to apply. Applicants should have an excellent command of English. Fluency in Putonghua is highly desirable, particularly as the appointee will be expected to contribute to teaching delivered in Putonghua; however, exceptional candidates without Putonghua fluency may also be considered. International experience would be highly valued.

Applicants for Associate Professor should demonstrate a strong track record and impact through research and/or substantial professional or industrial achievements. Applicants for Assistant Professor / Research Assistant Professor should demonstrate scholarship, research, applied R&D or significant professional achievements. For all ranks, knowledge transfer and industry impact will be valued alongside scholarly outputs.

For information on the Department of Science and Environmental Studies, please visit: https://ses.eduhk.hk/ses/en

Salary will be commensurate with qualifications and experience.

Initial appointment will be made on a fixed-term contract. Fringe benefits include the University's Voluntary Contributions to MPF Scheme or a contract-end lump sum payment (totaling up to 15% of the basic salary), leave, medical and dental benefits, and, where applicable, housing benefits.

The University only accepts and considers applications submitted online for this post. Applicants should complete the online application form and upload a full CV on or before **23 December 2026.** Applications which are incomplete or without the required documents may not be considered. Personal data provided by applicants will be used for recruitment and other employment-related purposes. For details of the Personal Information Collection Statement, please refer to http://www.eduhk.hk/jobsopp/index.php?glang=en.

All applications will be treated in strict confidence. Only those who are shortlisted will be contacted. The University reserves the right not to fill the position(s) advertised. Since the incumbent's work would involve contacts with persons aged under 18 and/or mentally incapacitated persons, prospective employee(s) will be required to undergo Sexual Conviction Record Check operated by the Hong Kong Police Force.
