### **Synopsis**

The General Education Consolidation Course aims at helping students reflect on their learning experience in their university years and to develop an integrated view of how and where they position themselves in relation to their future goals, career plans, and personal aspiration. This elective course adopts a narrative approach which focuses on understanding personal and social experiences within a 3-dimensional inquiry framework of time, places, and people. Through a wide variety of narrative exercises, it will help students synthesize their past experiences, examine their present values and future aspirations, and put these in perspective onto a wider social context. Through active participation in various reciprocal learning activities with peers, the students will gain a better understanding of self and others in social context and will be better equipped to live a more fulfilling life and make their unique contributions to the society upon graduation.
