167 Overview of FLASS

168 Index
The Faculty of Liberal Arts and Social Sciences (previously the Faculty of Arts and Sciences) was renamed in September 2012 to reflect the strategic growth in research capacity and teaching expertise in liberal arts and social sciences. The Faculty is comprised of six academic departments:

Department of Asian and Policy Studies (APS)
Department of Cultural and Creative Arts (CCA)
Department of Health and Physical Education (HPE)
Department of Mathematics and Information Technology (MIT)
Department of Science and Environmental Studies (SES)
Department of Social Sciences (SSC)

Staff members across the Faculty have a strong interdisciplinary focus, jointly teaching liberal arts and social sciences programmes, engage in collaborative research, and operate as a community of scholars committed to both research and teaching excellence.

With an emphasis on interdisciplinary research, the Faculty aims to provide students with creative scholarship and thought leadership as a foundation for research-led teaching, a creative learning commons, and a learning environment that nurtures intellectual investigation, development, and discovery.

Academic staff in the Faculty come from a broad spectrum of social sciences and liberal arts disciplines, including policy studies, education, political science, sociology, environmental and urban studies and related sub-fields in international relations, political economy, comparative politics and regional studies, and anthropology. Each hold doctoral degrees from local and leading international universities and are committed to research excellence evidenced by the placement of publications in distinguished international journals and publishing houses.

I invite you to explore the research compendium and the contributions by staff to research, research leadership, and intellectual discovery.

Professor Joshua Mok Ka-ho
Dean, Faculty of Liberal Arts and Social Sciences
Associate Vice President (Research & International Exchange)
Director, Centre for Greater China Studies
Mong Man Wai Library
The Hong Kong Institute of Education is one of eight publicly funded tertiary level institutions in Hong Kong and is distinguished by its regional and international scholarship in education and education-related fields, including the areas of liberal arts, social sciences and the humanities. Founded in 1994 with the amalgamation of teacher training colleges, the Institute is now composed of three faculties (the Faculty of Liberal Arts and Social Sciences, the Faculty of Humanities, and the Faculty of Education and Human Development), 16 academic Departments and a Graduate School, offering a full range of undergraduate, postgraduate, and doctoral programmes in education and education-related disciplines. From relatively humble beginnings, the Institute now has a 400 strong professoriate, 97% of whom hold doctoral qualifications from local and leading international universities, and 15% of whom hold the rank of Professor or Chair Professor and are internationally distinguished in their respective fields.

From an original focus on teacher training, the Institute has emerged as a leading centre of research excellence in social science and liberal arts, with particular expertise in environmental and global studies, policy studies, public administration and management, health policy, and social policy in areas such as aging and social stratification in Hong Kong, the Greater China region, and beyond.

The transformation in research capacity now places the Institute as one of the most competitive of the eight publicly funded tertiary institutions in Hong Kong in education, humanities and social sciences, with the Institute year-on-year increasing its share of General Research Fund (GRF) and Early Career Scheme (ECS) grants from the Research Grants Council (RGC) to place it third in competitive grant allocations. At the same time, the research intensity and research recognition of the Institute in social sciences and liberal arts is now equal to or greater than that of many peer institutions in Hong Kong and the region.

This *Compendium of Research 2010-2013* places on record the professional and scholarly achievements of academic staff in the Faculty of Liberal Arts and Social Sciences. It also demonstrates our intellectual distinctiveness and commitment to research and intellectual inquiry beyond the confines of any one discipline, and to a collective project of shaping the theoretical frameworks that will inform knowledge and understanding in the future.

It gives me great pleasure to commend to you the *Compendium of Research 2010-2013*.

Professor Darryl Jarvis
Associate Dean, Research & Postgraduate Studies
Faculty of Liberal Arts and Social Sciences
CENTRE FOR GREATER CHINA STUDIES (CGCS)

Director: Professor MOK Ka-ho, Joshua
Associate Vice President (Research and International Exchange)
Chair Professor of Comparative Policy

The CGCS is one of the faculty-based centres of FLASS, which has been organising research conferences, seminars, and symposia related to development, policy and governance in the Greater China region. Through developing an interdisciplinary research strategy and networking with leading academic, prominent scholars and research institutions in Greater China and overseas, active researchers in Greater China studies are brought together to critically examine various kinds of academic, policy and practical issues.

Our mission: The HKIEd is committed to promoting interdisciplinary and cutting-edge research with a focus on the multidimensional transformations of Greater China, Asia and beyond. As a major institution offering professional education training in Asia, the HKIEd has the largest critical mass of academics and researchers in the field of educational studies and its research in social sciences and liberal arts has expanded considerably. With more than 30 professors and chair professors leading a wide range of research topics related to education, development, policy and governance, and arts and culture, the CGCS has already developed strong research links with leading research and academic institutions in different parts of the world for promoting inter-university research collaborations. As a leading research centre offering quality education programmes to nurturing students to become caring leaders with global visions, the CGCS is committed to providing training and education for students to deepen their understanding and interest in the development, policy issues and governance of Greater China and its interactions with the world.

Our vision: Established in September 2010, the vision of the CGCS is to further develop Greater China studies at the HKIEd to a higher level through formulating an interdisciplinary research strategy, networking with prominent scholars in Greater China and countries abroad, and looking for outside funding support which brings about high quality publications. The CGCS seeks for donations from social and business sectors to support relevant research projects and conferences. With a strong conviction to promote interdisciplinary research, the Centre has established five major research groups involving different departments in FLASS. Colleagues from the FLASS will reach out to their counterparts from the Faculty of Education and Human Development (FEHD) and Faculty of Humanities (FHM) in developing interdisciplinary, new and innovative research collaborations.

The five major research themes are focusing on the following areas:

(1) Cooperation between Greater Pearl River Delta (PRD), Hong Kong and Taiwan;
(2) Educational, Cultural and Social Change;
(3) Science, Technology and Sustainability;
(4) Comparative Development, Public Policy and Governance; and
(5) China and the Globalising World.
CENTRE FOR EDUCATION IN ENVIRONMENTAL SUSTAINABILITY (CEES)

Director:  Professor SO Wing-mui, Winnie  
Head, Department of Science and Environmental Studies  
Associate Dean, Graduate School

The vision of the Centre is to further develop environmental education and sustainability studies in Hong Kong through the formation of research and knowledge transfer networks with academics, scholars and professionals in local, Greater China and overseas universities, extending the research agenda from local viewpoints to regional and international perspectives.

The mission statement of the Centre is “to improve the understanding of environmentally-related matters via education in environmental sustainability and to stimulate remedial actions through research and public education”.

The Department of Asian and Policy Studies (APS) is a research intensive Department that prides itself on policy driven research focused on Asia. The Department draws on a community of established and emerging scholars who have been trained internationally, and whose research interests range from social and urban policy in Asia, comparative education policy and management, governance, regulation and the political-economy of state-market relations, health policy, affordability and access to health care, gender, communications, development, and the rise of China and super-power rivalry.

The Department counts among its faculty internationally recognised experts in health, education, social security and social protection, housing and ageing policy, and in regulation and public sector management. Many of the Department’s faculty have acted as consultants or expert advisors to organisations such as the World Bank, Asian Development Bank, UNICEF, the Central Policy Unit Hong Kong, the Japanese Ministry of Finance, and various private sector organisations. Several of the Department’s faculty also hold international editorships with journals such as Policy & Society: Journal of Interdisciplinary Policy Research, Journal of Asian Public Policy, Asian Education and Development Studies and Aging and Mental Health, and hold book series editorships with leading publishers such as Routledge (Comparative Development and Policy in Asia), Springer (Higher Education in Asia: Quality, Excellence and Governance) and Palgrave Macmillan (Studies in the Political Economy of Public Policy).

The Department’s faculty have been recognized for their scholarship with the award of various competitive peer reviewed grants, including grants from the Research Grants Council, General Research Fund, Public Policy Research Grant and Strategic Public Policy Research Grant (Hong Kong); Australian Research Council (Discovery & Linkage Grant Scheme); National Natural Science Foundation of China; Ministry of Education Academic Research Grants Scheme (Singapore); Central Policy Unit research grants (Hong Kong); and the Rockefeller Foundation (New York), among others.

The Department’s faculty are widely published in distinguished international journals such as Regulation & Governance; Journal of Contemporary Asia; World Development; European Journal of Law and Technology; International Relations; Energy, Politics and Society; Journal of International Relations & Development; Asian Survey; Journal of Affective Disorders; Journal of Clinical Psychiatry; Habitat International; American Journal of Geriatric Psychiatry; Health Policy and Planning; Journal of Education Policy; Journal of Higher Education Policy; Journal of Higher Education; Journal of International Social Welfare; Social Policy & Society; Governance; Globalization, Societies & Education; Journal of Higher Education Policy and Management; Public Administration and Development; Public Administration Review; Eurasian Geography and Economics; Technology in Society; Review of Public Personnel Administration; Journal of Contemporary China; Public Choice; American Journal of Epidemiology; Global Society: Journal of Interdisciplinary International Relations; Journal of Gerontology: Social Sciences; Pacific Review; and Asian Studies Review.

The Political Logic of Basic Education Provision: Evidence from China.
The Department of Cultural and Creative Arts (CCA) enjoys a leading team of academics and researchers in the fields of musical arts, visual arts, and interdisciplinary arts. Because of the varied nature of creative arts and culture disciplines, the research outputs of the Department’s staff members are both traditional and non-traditional in nature. The former contributes to the fields related to arts, arts education, and interdisciplinary studies. The latter is made up of outputs such as artistic and practice-based research which includes music compositions and performances, art productions and exhibitions. To recognise the rigor of non-traditional outputs, the Department has established a mechanism to assess these non-traditional outputs with detailed assessment criteria including both internal and external peer review.

The research expertise and areas in the Department are diverse and include: creativity and assessment in arts education, arts curriculum and instruction, transmission of Cantonese opera, choral and instrumental pedagogy, music technology, jazz pedagogy, arts appreciation, museum education, arts and culture education, arts administration, visual culture, digital arts, various studio art media, and interdisciplinary studies in the arts culture.

The Department has successfully competed for two General Research Fund projects funded by the Research Grants Council: assessment of creativity in curriculum reform (2009) and the transmission of Cantonese opera (2011). In addition, the Department has received a HK$2.6 million Quality Education Fund grant for a project on artist-teacher partnership teaching of Cantonese opera in schools. This project received the Musical Rights Award presented by the International Music Council in 2011, and was recognised for “allowing young people to acquire a demanding and expressive musical language while ensuring the sustainability of a music tradition that needs special attention and care.” Staff members’ creative outputs have also been recognised in important regional and international competitions and exhibitions such as the Hong Kong Art Biennial Exhibition, and are permanent collections at major museums. The visual arts area also received a generous private donation of HK$5 million to develop arts education and community development activities and research. CCA staff have given presentations at numerous regional and international conferences such as the 2nd Asian Conference on Arts & Humanities (2011), World Alliance for Arts Education Summit (2009), 7th International Conference on the Arts in Society (2012) and the 30th World Conference on Music Education (2012).

In 2011 the Department was bestowed the honor to host the UNESCO Arts in Education Observatory for Research in Local Cultures and Creativity in Education (UNESCO-RLCCE). UNESCO RLCCE serves as a center for advancing new education approaches related to local arts and culture in response to UNESCO’s Seoul Agenda (2010). See http://www.unescochkied.org/.

The Great Wall for clarinet, bassoon and piano.

The Maximum Speed of Raphael’s Madonna for flute and piano.

Tunneling for piano and electronics.
The Department of Health and Physical Education (HPE) is a research active department in educational research, particularly in the area of pedagogy and curriculum development in Physical Education and Sports Sciences with a strong focus on human movement analysis, health-related research concentrating on health education and promotion, program design, development, and evaluation.

The department enjoys a diverse collection of research active scholars and research practitioners, including an Endowed Chair Professorship who has patented works in the area of telehealth, the only certified adapted physical educator in Hong Kong, a Justice of the Peace appointed for his contribution and commitment to Physical Education and the Physical Education Profession, and a Fellow of the American College of Epidemiology a prestigious body in the field.

Staff in the Department are engaged in research work in different disciplines, actively publishing in high ranking journals. These include British Medical Journal, Nature group International Journal of Obesity, American Journal of Epidemiology, BMJ group Injury Prevention, JAMA journal Archives of Pediatrics and Adolescent Medicine, Muscle and Nerve, Journal of Clinical Nursing, Adopted Physical Activity Quarterly, Research in Developmental Disability, Pacific-Asian Education, Journal of Nutrition Education and Behaviour, Birth, BMC Pregnancy and Childbirth, Journal of School Nursing, Journal of Cardiovascular Nursing, European Physical Education Review, and Health Education. In addition, members of the faculty have also authored book chapters as and are actively contributing to scholarship through authorship of monographs.

The Department has also successfully secured research funding support from many different sources including three Internal Research Grants (IRG), two Early Career Researcher Grants, and three projects supported by the Knowledge Transfer Funding scheme. In addition, the department has been successful in obtaining the Tin Ka Ping Mainland Scholar Scheme for the visit of prominent medical researchers from mainland China. Members of the faculty have also received other external grants from organisations such as the Education Bureau and various industry organisations.

Staff in the Department are Fellows of many highly regarded international professional and academic bodies, including the American College of Epidemiology and the US Research Consortium of AAHPERD. Among our midst, one is a founding member of the Hong Kong Society of Sport and Exercise Psychology (HKSSEP), another is the immediate past president of the Asian Society of Adapted Physical Education and the current assistant Secretary General of the Asia Pacific Council of Exercise and Sports Sciences. One staff member is also the President-elect and the Chairperson of the Governance Committee of the Honour Society of Nursing Sigma Theta Tau International.
Research Focus:

- Behavioural and Clinical Epidemiology
- Clinical Trauma Management and Injury Prevention
- Paediatric and Adolescent Mental Health
- Environmental Child Health
- Risky Behaviours Among Young People

The Department of Mathematics and Information Technology (MIT) is committed to producing internationally-recognised research outputs in the areas of mathematics, information technology, mathematics education, information technology education and information technology in education. The Department has an eminent track record of conducting theoretical and empirical research in multidisciplinary areas.

Underpinned by its commitment to research and academic development, the Department has implemented over 50 projects in a wide range of areas since its establishment in July 2009, with the support of research grants such as competitive General Research Fund awarded by the Research Grants Council, funding from the Education Bureau, industrial donation and the European Union.

Our research areas include:

- Assessment and Evaluation in Mathematics
- Assessment on Evaluation using Information Technology
- Cognition and Technology in Mathematics Education
- Computer Supported Collaborative Learning
- Curriculum Studies in Mathematics Education
- Educational Multimedia Technology
- e-Learning
- History and Pedagogy of Mathematics
- Information Literacy Education
- Inquiry Learning
- Learning Studies in Mathematics and Information Technology
- Mathematization in Mathematics Teaching
- Mobile and Ubiquitous Learning
- Pedagogy in Mathematics Education
- Policy, Practice, and Research in Technology Transformed Learning
- Problem-solving in Mathematics
- Professional Competence in Mathematics Teaching
- Professional Competence in Teaching in Technology-rich Environment
- Research in Applied or Pure Mathematics
- Teaching and Learning of College Mathematics
- Teaching and Learning of School Mathematics
- Web and Social Networking

The Department initiated and is also host to an International Research Network (IRN) in the World Education Research Association (WERA) entitled ‘Theory and Practice of Pedagogical Design for Learning in Digital Classrooms’. The network aims to facilitate professional networking for the collaborative endeavours in practice-driven research in pedagogical design conducive to effective orchestration of learning in digital classrooms.

The Department has produced a substantial number of high quality academic publications of both local and global importance, including in top-tier international journals such as British Journal of Educational Technology; Journal of Economic Dynamics and Control; Nonlinearity; SIAM Journal on Discrete Mathematics; Applied Mathematics and Computation; Computers and Education; Computer-Supported Collaborative Learning; Discrete Applied Mathematics; Educational Technology Research and Development; European Journal of Operational Research; International Journal of Mathematical Education in Science and Technology; Journal of Physics A: Mathematical and Theoretical; Physical Review A; Differential and Integral Equations; Taiwan Journal of Mathematics Teachers; The Journal of Mathematical Analysis and Applications; Transactions of American Mathematical Society; ZDM- The International Journal on Mathematics Education.
Prof. KONG, Siu Cheung  
BBSc, PGDE, MA(CUHK), MSc, PhD(CityUHK)

Research Focus:
- IT in Mathematics Education
- Pedagogy in the Digital Classroom
- Information Literacy Education
- IT in Science and Inquiry-Based Learning
- Policy on Technology-Transformed Education
- Professional Development of Teacher for Learner-Centered Learning in Seamless Learning Environments

Research by SES

The Department of Science and Environmental Studies (SES) aims to play a leading role in the Asia-Pacific region on research and scholarly activities centred round the interdisciplinary areas of Science and Environmental Education.

During 2010-13, colleagues in the Department secured internal and external funding to undertake over 40 research projects related to teaching development, knowledge transfer and consultancy work in a wide spectrum of areas such as:

- Astronomy and physics education
- Biology and health education
- Chemistry education
- Creativity
- E-learning
- Environmental education
- Interdisciplinary study
- Science education
- Teacher education
- Technology/ICT in education
- Antibacterial coating
- Applications of transition metals
- Chemical sensors and molecular devices
- Heavy metal contamination in farmland
- Indoor air quality
- Properties of rare earths
- Soil erosion dynamics
- Waste management/treatment

Staff in the Department also secured two General Research Fund grants (Award by the Research Grants Council, Hong Kong) for projects in science education and another four Early Career Scheme projects in science and environmental studies.

The research outputs of staff have been published in various national and international refereed journals of which many are indexed in the SCI or SSCI database. The Department also publishers an open-access journal called “Asia-Pacific Forum on Science Learning and Teaching” (ISSN 1609-4913). In 2013, the Department hosted the East-Asian Association for Science Education 2013 International Conference in HKIEd and co-organised the Global Chinese Conference on Science Education 2103 in Guangzhou.

The Department also hosts a faculty-level research centre for Education in Environmental Sustainability. The Centre received a $1.7 million major equipment grant from the Institute to acquire advanced scientific apparatus for specific research and teaching purposes. The establishment of the centre for Education in Environmental Sustainability will add further to the research capacity and research led teaching of the Department in the years to come.

The Department of Social Sciences (SSC) has a critical mass of faculty members conducting cross-cutting research in different areas, including the politics of global climate change, environmental policy and governance, sustainable development, urban transport, gender and education, Chinese lineage and identities, Chinese ethnic minorities, Chinese nationalism and politics, comparative political economy, policing and cross-border crime, business studies, and teacher-student power relations. As of June 2013, the Department has 23 academic staff members and 7 administrative colleagues, apart from a number of research assistants who are providing research support for the academic colleagues.

Since 2009, faculty members in the Department have acquired various externally competitive grants from the University Grants Council, conducting research in their areas of specialisation. These grants include the following:

- China and Global Warming: Reconciling international justice and the realities of climate change, 2010-2011.
- Socio-Spatial Embeddings of Economic Actions: South Asian Ethnic Minorities in Hong Kong, 2010-2011.
- Gender and Leadership: Life Histories of Female and Male Primary School Principals in Hong Kong, 2010-2011.

Some colleagues are serving as the editors of the editorial boards of academic journals. Seminars, workshops and conferences have been held regularly, including the annual conference of the Asian Studies Association Hong Kong in 2012, the cross-border policing conference in 2013, and the citizenship education workshop in the summer of 2013.

At the same time, departmental seminars are regularly held to ensure that all faculty members share their research findings with their colleagues and students. Honorary professors have also been invited to discuss their research findings with faculty members, departmental colleagues and graduate as well as undergraduate students.

The Department remains very active in its community outreach, such as the annual liberal studies conference and the summer lectures for secondary school teachers and students. These annual conference and summer lectures were very well received in the community—a testimony to the strenuous efforts made by the Department to help the society understand liberal studies and Hong Kong society as well as politics in an extensive and in-depth manner.

Academic staff members in the Department have been sharing their research findings through conferences, knowledge transfer workshops, journals articles and books. The Social and Policy Research Unit under the Department has published occasional policy papers which were circulated widely in the community. Colleagues are also actively interviewed by the mass media on their research findings and expert knowledge. In the recent years, the Department has been attracting doctoral students not only locally from Hong Kong but also from mainland China and Italy.

Overall, the Department of Social Sciences is extremely dynamic and active in its research outputs, carving a niche in the special areas of specialisations among its academic staff members. Their research agendas are in line with the main foci of the Department’s programs, namely Global and Environmental Studies as well as Liberal Studies Education at the undergraduate level.
