

**Dr Bev Flückiger**Griffith University  
Australia

E. b.fluckiger@griffith.edu.au

Bev Flückiger is a member of the Griffith University Institute for Educational Research (GIER), and a co-leader of the GIER Research Program, *Leadership for Learning*. Over the last eight years she has worked extensively with Greer Johnson and colleagues on projects to improve the educational outcomes for disadvantaged children, including Indigenous children living in remote communities. Most recently Bev has led research and professional learning in 124 Queensland schools to enact pedagogical change in the early years. The project, funded by the Department of Education (DET), has engaged school leaders and teachers in action research as a vehicle for both informing and leading pedagogical change processes. Its innovative design has demonstrated the potential positive impacts which can be generated when systems, schools and universities work together. Bev's particular interest is leadership in the early years of school to ensure that all children have the opportunity to engage in learning, exercise agency, and experience success. Two recent publications include:

Flückiger, B. & Klieve, H. (2016). Conceptions of learning leadership in remote indigenous communities: A distributive approach. In G. Johnson and N. Dempster (Eds.). *Leadership for learning and effective change*. Dordrecht, The Netherlands: Springer.

Flückiger, B., Dunn, J. & Wheeley, E. (2015). Age-appropriate pedagogies for the early years of schooling: Foundation paper. Brisbane: Queensland Government Department of Education and Training. Retrieved 11th January, 2016: <http://deta.qld.gov.au/earlychildhood/pdfs/foundation-paper.pdf>
