Shanghai 2025 上海

Liying Primary School

Since its establishment in 1998, Shanghai Liying Private Primary School has adhered to the people-oriented, connotative development, and characteristic school-running, and has constructed a management model of "student development-oriented, teacher development-oriented and service-oriented to parents".

It has established the educational philosophy of "developing students' wisdom with multiple intelligences, laying the foundation for students' future with modern technological information literacy, and highlighting students' individuality with exquisite art education", and actively carried out school-running practices with the characteristics of information technology education and art education, enjoying a reputation in the region and even in Shanghai.

It has successively been a pilot school for educational informatization of the Ministry of Education, a demonstration school for the characteristic construction of private primary and secondary schools in China, a characteristic creation school for private primary and secondary schools in Shanghai, an advanced collective of educational informatization in primary, secondary and kindergarten in Shanghai, and an art characteristic school in Hongkou District, etc.
