## **Abstract**

With the current trend of all-around education in children's development, this paper, through theoretical research on fine art education and science education, tries to further explore and clarify the relationship between the two, as well as identify its great importance on modern education reform and development. The author hopes this paper will help to enlighten and lead education cultivation in modern schools and encourage educators to coordinate development between science and humanity.

**Keywords:** Fine Art Education, Science Education, Creativity.
