Part II

1. Synopsis

China and India are two rising stars of the 21st century. Increasingly, China and India are playing important roles in the global economy and global governance. They are depicted as the drivers of the global economy especially after the financial crisis 2008-09. Nevertheless, our understanding of China and India has remained fragmented and patchy. This course aims to examine development policy in China and India. The following questions will be investigated: how China and India have launched developmental initiatives, what policy instruments have been used in these two countries, what administrative systems of governance have been adopted, and what the implications are for other developing countries.

2. Course Intended Learning Outcomes (CILOs)

Upon completion of this course, students will be able to:

- CILO₁ understand the concept of development policy.
- CILO₂ compare the policy instruments used by China and India and evaluate the effectiveness of these policy instruments.
- CILO₃ learn the dynamics of state-market-business strategies and policy.
- CILO₄ evaluate administrative systems of governance in China and India.
- CILO₅ examine “good governance” in developing countries.
