

Departmental Seminar (2016-2017)

A new online process for assessing individual contributions to a team project: will it work?

Speaker: Prof. C. K. WOO
The Education University of Hong Kong

Language: English

Date: 22 June 2017 (Thursday)

Time: 11:00 a.m. – 12:00 noon

Venue: Room DLB 905
David C. Lam Building
Shaw Campus
Hong Kong Baptist University

Abstract

Using findings from electricity economics, we propose an online process for scoring individual contributions to a team project, a popular teaching / learning tool in higher education. Our proposed process is fair, easy to implement, low cost and perfectly general – an innovative solution to a common problem faced by teachers worldwide. Highlighting the process' practicality and usefulness is the current list of early adopters who teach in Hong Kong, Mainland China, Australia and the U.S.A. Hence, our proposed process deserves serious consideration by teachers of energy economics and other disciplines.

All are welcome
