Subject: Geography

Topic: Population Density

Level: S. 1

## Learning objectives:

1. Content:
i. Reading tables
ii. Calculations of Population Densities
iii. Information transfer - completing sentences
iv. Cognitive skills: Comprehension, Application
2. Language objective:

Students should be able to calculate population densities and Make comparisons between cities and countries around the world usingAmong the countries given, $\qquad$ is the $\qquad$ . and From the two cities given, $\qquad$ is the $\qquad$

## S. 1 Geography <br> Population Density <br> Worksheet 1

Name: $\qquad$ Class: $\qquad$ No: $\qquad$ Date: $\qquad$

Population Density $=$

Find the population densities of the following places. Write your answer in the right-hand column.

|  | Population in <br> thousands | Area <br> (thousand sq. km.) | Population <br> density <br> (people /sq.km.) |
| :--- | :---: | :---: | :---: |
| Country | 1211 | 9597 | 0.12 |
| China | 263 | 9363 |  |
| USA | 30 | 9922 |  |
| Canada | 18 | 7682 |  |
| Australia | 6687 | 1062 |  |
| City | 3539 | 12406 |  |
| Hong Kong | 170368 | 1.46 |  |
| Sydney | 577500 | 11 |  |
| District | 180000 | 138 |  |
| Mong Kok | 229724 |  |  |
| Kwun Tong |  |  |  |
| Wan Chai | Yuen Long |  |  |

Name: $\qquad$ Class: $\qquad$ No: $\qquad$ Date: $\qquad$

1. From the $\mathbf{4}$ countries given, which country has the highest population density?

From the 4 countries given, $\qquad$ has the highest population density.
2. From the 4 countries given, which country has the lowest population density? From $\qquad$ .
3. From the 2 cities given, which city has a higher population density?

From the 2 cities given, $\qquad$ has a higher population density.
4. From the 2 cities given, which city has a higher population density? From $\qquad$ .
5. From the 4 districts given, which district has the highest population density? From $\qquad$ .
6. From the 4 districts given, which district has the lowest population density? From $\qquad$ .
