The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Sub-degree, Undergraduate, Taught Postgraduate, Professional Doctorate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

- 1. Problem Solving Skills
- 2. Critical Thinking Skills
- 3. Creative Thinking Skills
- 4a. Oral Communication Skills
- 4b. Written Communication Skills
- 5. Social Interaction Skills
- 6. Ethical Decision Making
- 7. Global Perspectives

1. Course Synopsis

This course aims to develop students' reading skills in English dramatic literature and expose them to various plays. Students will gain familiarity with the conventions of English plays, such as stage directions, types of stages, and the relationship between written text and performance. The course will cover five plays that represent significant movements in twentieth-century theater. Emphasis will be placed on studying narrative structure, spatial elements, dialogue flow, and conflicts in drama. Students will have opportunities to perform scenes in class and present creative reinterpretations of one or more plays from the course. The focus of these activities is not solely on improving performance skills but rather on understanding the process of translating written works to the stage and nurturing imaginative engagement with the literature.

2. Course Intended Learning Outcomes (CILOs)

Upon completion of this course, students will be able to:
