Faculty at a Glance

Faculty at a Glance

Diversity is at the heart of the Faculty of Liberal Arts and Social Sciences (FLASS), which is a big family of dedicated educators, committed researchers and diligent students. The faculty, which comprises six academic departments and four research/ resources centres, covers a wide range of subjects. These include science and environmental studies, social sciences, mathematics, information technology, policy studies, creative and performing arts, health and physical education. The diversity of our academic disciplines enables our students to have ample opportunities to expose themselves to a variety of perspectives and knowledge sets.

In modern society, diversity has become increasingly important, as it brings together different knowledge sets, ideas and perspectives that drive innovation and creativity. Subjects and disciplines are intersecting with one another more and more, and those with a well-rounded personality, multiple skill sets and knowledgeable across a range of areas are in great demand. To meet the needs of our society and beyond, FLASS provides students with a comprehensive education, equipping them with the necessary academic knowledge and skills for the teaching profession or other career opportunities. Teaching knowledge and skills aside, we consider building character an important part of education. As such, we are devoted to nurturing our students to become caring leaders with a global vision.

Today, knowledge is evolving at an ever-accelerating pace. In order to equip our students with the latest knowledge and keep us at the frontier of the academic world, FLASS is committed to conducting high-quality and impactful research that will enhance the well-being of mankind and support our teaching needs. Through the efforts of our dedicated staff and students, the faculty will continue to do its best to serve our society and beyond.

Bachelor of
Education
(Honours)

Bachelor of Education (Honours)

The Bachelor of Education (Honours) programmes prepare students to become outstanding primary/secondary school teachers who have solid academic knowledge and broad-based professional knowledge and skills.

EdUHK is one of the teacher education providers in Hong Kong. Graduates of the University's teacher education programmes are eligible to apply to become fully qualified and registered teachers. As regards teacher registration, graduates should approach the Teacher Registration Team of the Education Bureau (EDB) to submit applications directly. All applications will be assessed by the EDB which will consider, among other things, whether an applicant has been convicted of any criminal offence (including sex-related offence) in Hong Kong or elsewhere, or is involved in any ongoing criminal proceedings or investigations.

FLASS offers the following full-time Bachelor of Education (Honours) programmes:

For teaching in secondary schools

- Business, Accounting and Financial Studies
- Geography
- Information and Communication Technology
- Science

For teaching in primary schools

- General Studies
- Mathematics

For teaching in both primary and secondary schools

- Physical Education*

Special Features

Students will be able to

- integrate subject knowledge, professional knowledge and practical skills;
- apply solid and comprehensive knowledge of a chosen major;
- develop broad intellectual perspectives and thinking skills through studying General Education courses;
- participate in school field experience to further enhance academic knowledge, professional knowledge and pedagogies;
- strengthen language proficiency of English, Chinese and Putonghua through studying Language Enhancement courses; and
- take part in student exchange programmes and study tours to broaden their international horizon.

Career Prospects

The in-depth academic and professional knowledge confer graduates of the programme with excellent career prospects. They will possess a Qualified Teacher Status in Hong Kong and are ready to become fully qualified teachers in local primary or secondary schools. In addition to the professional teaching career, graduates will possess the academic knowledge and intellectual skills to embark on a wide variety of other relevant jobs in the government sector, non-government organisations, commercial organisations, publishing sector, etc.

* Students admitted into this programme are normally assigned a focus of study (i.e. primary or secondary level) by the end of their first year of study. The focus of study will be reflected in the arrangements for their Field Experience and adopted for the purpose of application for Qualified Teacher Status in Hong Kong upon graduation. This programme is designed to provide students with the disciplinary and professional competency to teach in both primary and secondary schools. However, recognition of Qualified Teaching Status (QTS) in primary or secondary schools in Hong Kong is subject to the decision of the Education Bureau (EDB). Graduates of this programme are required to approach the Teacher Registration Section of the EDB to submit applications directly and all applications will be assessed by the EDB.

Programme Aims

The programme aims at equipping pre-service teachers who will be able to teach Business, Accounting and Financial Studies (BAFS) and Business Fundamentals (BF) curricular in senior and junior secondary schools. Upon completion of the programme, students are expected to be able to:

- demonstrate a solid understanding of business and business-related disciplinary concepts and theories from an entrepreneurial perspective;
- apply business and business-related knowledge and skills to solve business problems in a responsible, creative and innovative manner;
- integrate business and business-related concepts, theories and approaches to form ethical decision-making;
- critically examine the contemporary issues in business environment and technological advancement from global and multi-cultural perspectives;
- conduct systematic research to evaluate local, regional and global contemporary business and business education issues; and
- display competent teaching and professionalism for quality business education provision in schools and beyond.

NG Hok Yu (2022 Graduate)

"My five-year study journey at EdUHK was full of memorable moments, during which the BEd(BAFS) programme contributed a lot to my personal and career development.

The formal lessons paved a progressive learning pathway for me to learn about business-related knowledge, educational theories and, above all, the pedagogical knowledge for teaching BAFS. On top of these, I was able to turn theories into practices during the two teaching practicums. These provided me with many hands-on experiences for polishing my teaching and classroom management skills.

Apart from formal learning, students at EdUHK enjoy numerous opportunities to participate in different informal learning activities. I joined a number of activities and took up different roles at the university. For instance, I was a committee member of the Association of Business Studies. I participated in the Leadership Enhancement And Development (LEAD) programme as well as many business-related competitions. In addition, I took part in a mentorship scheme in which I followed university professors to carry out different projects related to BAFS teaching and learning. All these activities helped me to strengthen my soft skills and build up more confidence in becoming a BAFS teacher.

All in all, I had a very fruitful learning experience in the BEd(BAFS) programme and I am very delighted that I will be a qualified and all-rounded BAFS teacher after graduation from EdUHK."

LAU Rachel (2022 Graduate)

"'Being illuminated and illuminating' describes the journey of studying for the BEd(BAFS) programme. As the programme title indicates, it is about education in BAFS. However, it is an enlightening programme that goes far beyond that. It enables students to choose among various streams of courses. Students can create their own learning path by allowing them to select some free electives of their own interests, so they can take a second major, or up to two minors. Some compulsory courses equip students with various teaching pedagogies and interactive approaches for teaching. These provide incredible insights to guide students to reach their potential and deliver personalised teaching in their teaching practices. Immense opportunities were provided for students to learn outside the classroom; for example, taking up roles in interest clubs, being a student ambassador as well as participating in overseas studies, services programmes and exposure tours. These experiences inspired and guided me to be a better teacher-to-be. With the understanding that comes with significant exposure, skills and knowledge, I am sure that students taking the BEd(BAFS) programme are ready to be illuminators."

Programme Aims

The programme aims at training pre-service teachers who will be able to teach Geography curriculum in the secondary schools. On completion of the programme, students are expected to be able to:

- demonstrate a solid understanding and command of geographical concepts and theories and apply the knowledge to solve geographical problems in the local, regional and global contexts with complex human-physical interface;
- develop learning capability to be a competent and effective learner and teacher in a dynamic and an ever-changing society;
- apply critical thinking to analyse the geographical and environmental issues that address the relationship among land, nature and people in the physical and human environments;
- demonstrate the pedagogical literacy and competency required for the development and implementation of curriculum in secondary schools; and
- develop essential abilities to plan, execute, report on field work and geographical research with the skills of data analysis, Geographic Information System, remote sensing and field studies.

CHOW Oi Chuen (2021 Graduate)

"Experiential learning is a good way to set learning goals. In Year 1, I decided to learn from others as much as I could. That means I learned not only through lectures, but also by looking up to my classmates to enhance my knowledge. During my internship at Greenpeace, I observed how plans were executed successfully. In Year 2, I repeated my first step of "learning from others". By Year 3, I already gained rich, broad ideas and knowledge in different areas, and I was confident to initiate projects like the Mass Check-Out Recycling Scheme and the Organic Graduation Flower Booth at the University. In Year 4, I focused myself on doing research and joined several field trips, which contributed to building my career path.

University studies teach us that we don't need to be afraid of failure because there are hundreds of challenges waiting for us to overcome. We should just keep adjusting our approach and changing our actions after each failed attempt until we succeed."

TSUI Ka Mei (2021 Graduate)

"Joining the Leadership Enhancement and Development Programme at EdUHK was a precious experience for me. During the two-week learning camp in Nepal, I broke through the limitations I had placed on myself and learned that happiness is about being satisfied with what you already have. When I held my hands together and said "Namaste" (a polite greeting used by Nepalese), the Nepalese people always returned it with genuine smiles. When I taught abroad as a volunteer teacher, I was overwhelmed by the children's enthusiasm to learn despite their poor learning environment. When I built stairs and roads in mountainous regions, I became more grateful and aware of what I had."

Programme Aims

This programme aims to prepare qualified physical education teachers for both primary and secondary schools. Upon completion of the programme, students are expected to be able to:

- demonstrate academic competence in disciplinary knowledge of humanities and science of human movement appropriate for teaching of PE in Hong Kong secondary and primary schools;
- apply theories into practice innovatively to serve as professional PE teachers facilitating pupils' informed and active learning in Hong Kong secondary and primary schools;
- value and understand critical sports-related values and attitudes;
- demonstrate critical understanding of curricular and pedagogical knowledge and skills appropriate for teaching of PE in Hong Kong secondary and primary schools;
- master and value a variety of physical activities as well as participate regularly in contributing to healthy and active lifestyles; and
- engage in on-going enrichment in professional and intellectual development concerning PE.

* Students admitted into this programme are normally assigned a focus of study (i.e. primary or secondary level) by the end of their first year of study. The focus of study will be reflected in the arrangements for their Field Experience and adopted for the purpose of application for Qualified Teacher Status in Hong Kong upon graduation. LEUNG Sik Yu Christy (Year 5 student)

"EdUHK and the Department of Health and Physical Education (HPE) have been gearing me up as a professional PE teacher during these four years. The BEd(PE) programme offers not only practical and theoretical courses, but also chances to host events in both mainstream and special schools. The department always organises a wide variety of events that help us become well-rounded PE teachers. As for me, with STEM as my minor, the department offers me opportunities to create my own products regarding STEM in PE and to cooperate with local schools for promoting PE in such interesting ways. As the vice-captain of the Women's Volleyball Team, I am thankful that the University always supports us by equipping us with the best facilities. I learnt how to be a leader and share the joy of playing sports at the University. I am glad to be a member of EdUHK and HPE which is supportive and full of fellow travellers."

BAU Hiu Lam Helen (Year 5 student)

"Throughout my study in BEd(PE), I have learnt a lot professional knowledge in physical education. It has provided me with different learning opportunities and the curriculum provides theory and practice integration. It educates me to become a teacher who is "physically educated" with character. I have also taken part in organising different sports events as a committee member during these years. These were fascinating learning experiences because I learnt how to handle administration work while organising an activity, which helped me to become a well-prepared teacher after graduation. I enjoy studying in the BEd(PE) programme as I have built up a close relationship with my classmates and teachers, which is definitely the most precious present I have ever received over these years."

Programme Aims

This programme aims to prepare our students to become outstanding primary school teachers who have positive professional attitude; have sound academic knowledge; have lifelong learning skills and are able to appreciate moral, social and cultural values; can work collaboratively with students, parents, colleagues, school administrators and other professionals; and understand education issues of Hong Kong and react positively to educational innovations. On completion of the programme, students are expected to be able to:

- demonstrate a solid understanding and command of the core concepts and methods of enquiry in social sciences, science and technology;
- show a broad understanding of the diverse social and cultural contexts in the local, national and global communities;
- demonstrate a thorough understanding of interdisciplinary concepts and approaches in curriculum integration and display competence in interdisciplinary studies and thinking;
- apply critical and creative thinking and problem solving abilities to deal with social, science, environmental and health-related issues;
- display positive attitude towards the acceptance of diversity and multiplicity; and
- demonstrate the pedagogical literacy and competency required for the development and implementation of curriculum.

LAW Nga Lai (2020 Graduate)

"The five years I spent at EdUHK were precious and unforgettable. They helped me achieve my dream of being a teacher and developed me into a better person. The various lectures of the BEd(P)-GS programme, alongside outdoor sightseeing activities, experiments, STEM activities and micro-teaching classes, taught us educational knowledge and trained us the skills required to become professional General Studies teachers. We learned about many different topics in various interesting ways.

I had the chance to join a summer exchange programme with the University of Seoul. The experience broadened my horizons. With hundreds of students coming from different places, the programme was like a mini United Nations where I made new friends from all over the world. In addition to learning Korean and experiencing Korean culture, I learned about different cultures and languages from my international friends. I became more enthusiastic about making new friends and open-minded about different cultures. I also joined short-term exchange programmes which provided me with the opportunity to visit different cities like Beijing and Harbin, and different universities, which helped me learn more about local culture. These exchange programmes were not only fun but also meaningful. A memorable teaching experience as a volunteer in Guangdong, for example, strengthened my interest and confidence in teaching.

I joined the Environmental Conservation Society and the AYP Society, where I helped organise different activities for our members. One of the exciting experiences I had was working with six other Hong Kong universities to launch a joint orientation camp where new students made friends from different cultures who were studying at different universities. That experience helped me become more outgoing and enhanced my confidence.

I appreciated every moment I spent at EdUHK. My time at EdUHK helped develop me into a teacher who is always joyful about teaching students."

LAU Wai Sum (2021 Graduate)

"I would like to share with you the great learning journey that the programme set out for me. The General Studies curriculum covered a wide range of areas, from science and culture to students' special education needs and teachers' professionalism. It also taught students many teaching strategies and arranged teaching opportunities for them. All these equipped me to be a more competent teacher. I joined various STEM workshops organised by the University. Covering topics such as 3D printing and designing mobile apps, these workshops further boosted my General Studies expertise. My learning horizons were broadened by minoring in Mathematics. I am grateful for the kind assistance and support from my teachers and classmates. Without them, I would not have had this mosaic of enjoyable experiences and a colourful university life."

This programme aims to prepare students to become outstanding primary Mathematics school teachers who have positive professional attitude; have sound academic knowledge and broad-based professional knowledge and skills; have lifelong learning skills and are able to appreciate moral, social and cultural values; can work collaboratively with students, parents, colleagues, school administrators and other professionals; and understand education issues of Hong Kong and react positively to educational innovations. On completion of the programme, students are expected to be able to:

- demonstrate an understanding of mathematical concepts and competence in explaining them clearly to school pupils;
- plan and implement appropriate learning, teaching and assessment strategies to cater for the pupils' individual differences in learning Mathematics;
- adopt appropriate strategies to arouse pupils' interest in learning Mathematics;
- enrich and apply critical and logical thinking skills in teaching and real-life settings;
- use information technologies and appropriate software to enhance learning and teaching of Mathematics; and
- demonstrate proficiency in coordinating STEM education in primary schools.

WONG Hoi Ching Esther (2022 Graduate)

"When I started studying at EdUHK five years ago, I was still wondering what I could learn from BEd(P)-MA. Now, I am grateful to have had a fruitful learning experience at EdUHK. The University provided different platforms for me to explore my interests, various activities to communicate with others, and professional training for becoming a teacher. During my studies, I have equipped myself not only with knowledge in pedagogy for mathematics but also in teacher professionalism, teaching techniques for students with special learning difficulties, and so forth and so on. EdUHK also provided different platforms for us to learn and practise our teaching through block practice in primary schools, STEM Internship, and being a helper in EdUFix Teaching Project Primary Mathematics, among others. These experiences built up my confidence in becoming a teacher after graduation. In addition, we can choose elective courses we are interested in, covering different aspects of general education and other minors. I explored the 'Exploring the Natural and Urban Landscapes in Hong Kong' and 'Hong Kong Marine Odyssey' through my general education courses. I also developed a great interest in STEAM education while taking 'Creativity in STEM/STEAM' as my minor.

Other than academic achievements, I competed in the Hong Kong Mathematics Olympiad (HKMO) when I was still in secondary school and participated in the EdUHK buddy scheme programme in sixth form, I am glad to have had the opportunity to be a volunteer in these activities to share my experience and give back to my juniors. During the process, I have also learnt to be communicative and cooperative. Moreover, I made friends and shared their joy and difficulties throughout these five years. I treasure the relationships with all my teachers and classmates here. If you want to be one of us, don't miss this valuable opportunity."

Programme Aims

The programme aims to prepare qualified, competent, professional secondary science teachers capable of teaching senior and junior secondary science subjects as well as satisfying the educational needs of learners with different abilities within a community that values multiple aspects of intelligence. On completion of the programme, students are expected to be able to:

- demonstrate command and understanding of the subject matter and pedagogical content knowledge of one science discipline, Chemistry;
- apply science knowledge and skills together with appropriate pedagogies to teaching students with diversified abilities and backgrounds, and in different school settings;
- exhibit professional competence and attitudes in teaching junior secondary science and one senior science subject, Chemistry;
- utilise different generic skills (e.g. problem solving, critical thinking, and creativity) in teaching and learning, and life-wide and lifelong professional development;
- exhibit proficiency in biliteracy and trilingualism in Chinese and English that facilitates effective communication in school and social contexts;
- critically and creatively analyse socio-scientific, technological, and environmental issues and concerns in the local, national, and global contexts; and
- display commitment to teaching with a professional ethical attitude, and a global and multi-cultural perspective.

LAU Kwan Kin Kenneth (2021 Graduate)

"I had an opportunity to join the EdUHK Diving Team, which allowed me to gain field experience in conducting underwater reef checks and algae surveys to support local marine research. This experience enhanced my research skills for my future career and broadened my horizons. EdUHK provided me with overseas learning opportunities in France, Tokyo and Sabah too. During a nine-day tour to Sandakan of Sabah, I observed how the Government of Sabah struck a balance between ecological conservation and development."

At EdUHK, I had a lot of opportunities to share my point of view about subject knowledge, conservation policy, and even our feelings about learning with the academic staff. Its open-minded culture facilitated my professional development to become a well-equipped teacher."

LAM Sze Ki (2021 Graduate)

"I majored in biology and chemistry. The department offers many opportunities for us to develop our strengths in teaching science subjects in a local school setting. In the Field Experience Enhancement Scheme before my practicum, I formed a six-member team to organise a three-hour STEM lesson for secondary school students. We taught the students how to make a remote control car and arranged an inter-class competition. It was my first opportunity to get hands-on experience using mirco:bit. That was indeed a great challenge for me. Fortunately, I received professional guidance from my professors and helpful support from my smart teammates. That experience was useful to me for preparing myself to be a qualified teacher. After organising and delivering the STEM lesson, I became interested in STEM education. Because of it, I have even applied for a part-time teaching assistant position in a STEM centre."

Programme Aims

This programme aims at providing students with a wide range of knowledge, concepts and applications of information and communication technology (ICT) to develop problem-solving skills in real-world settings. It also provides students with opportunities to appreciate the impact of ICT on the individual and society in the digital age, and equips students with innovative pedagogical knowledge, up-to-date subject knowledge, values, skills and practice essential to teach ICT in school education. On completion of the programme, students are expected to be able to:

- demonstrate an understanding of basic concepts in major areas of ICT that supports the applications of information processing, programming, database and Artificial Intelligence (AI) for problem-solving;
- demonstrate an understanding of methods for analysing computational problems, and planning and implementing solutions with ICT to real-world problems;
- realise the social, ethical and legal issues pertaining to the use of ICT and appreciate how digital literacy and the sharing of knowledge using ICT influence decision-making and shape our society; and
- learn to implement innovative pedagogical practices leveraged by digital technologies for effective teaching of ICT.

LIN QIUTONG Ada (2022 Graduate)

"The BEd(S)-ICT programme is not just about technology and programming. It is more about problem-solving and human interaction. The programme has equipped me with abundant opportunities to learn up-to-date ICT theories and teaching skills in a professional environment. Throughout my five years of study, I have received unlimited support and guidance from my academic advisors and enthusiastic tutors at every step. They have encouraged me to polish my subject knowledge and pedagogical skills. I still remember how impressed and inspired I was when my supervisor gave detailed and genuine feedback during my two teaching practicums. Their wonderful teaching experiences and sharing of a variety of classroom techniques in STEM education enlightened me to become a more confident teacher in the future. With planned scaffolding from the Department of Mathematics and Information Technology and EdUHK, I utilised different generic skills in teaching and learning, and applied them in various school settings where students had diverse abilities and needs. I am very grateful and proud to be a BEd(S)-ICT student. The learning experiences I gained through technology and education have prepared me well to become a teacher within a multicultural school community."

TSUI HOK SING Stanley (2020 Graduate)

"This programme equipped me with fundamental ICT teaching skills. It provided ample opportunities to enlighten me and to encourage me to step out of my comfort zone. With God's blessing, I received more than two teaching position offers during the challenging time of early 2020. I sincerely believe that the professional reputation of this programme will help me to find internship opportunities to practice my teaching skills. In the five fruitful years I spent at EdUHK, I am particularly grateful for my experience working for the Student Residents' Association, which helped me develop interpersonal skills that I find very useful when I attend interviews."

I participated in many STEM-related volunteer activities, like Teach4HK and CoolThink@JC, which helped build my portfolio. I find that most of the BEd(S)-ICT subjects have been revised and updated, which makes me jealous of the new recruits to the programme. If you really want to be a qualified ICT teacher, come and join us!"

Double Degree

Qualified
Teacher Status

Qualified to Teach in
both Primary and
Secondary Schools*

Field Experience

Internship

GBA Trip

Self-Nomination
Admissions Scheme

Programme Aims

The programme aims to prepare professional Music teachers and community-based artists. The programme is not only devoted to preparing qualified, competent, professional primary/secondary school teachers capable of satisfying the educational needs of learners with different abilities in a community, but also committed to nurturing community arts and cultural workers who values multiple aspects of intelligence.

Special Features

Students will be able to

- integrate subject knowledge, professional knowledge and practical abilities in Education Major and Discipline Major;
- participate in school field experience to further enhance academic knowledge, professional skills and practical approaches;
- have first-hand exposure to the operations of an organisation and reflect on the practices in the real working environment in the work-based internship experience;
- take part in the student exchange programmes and study tours to broaden their international horizon; and
- obtain a double degree upon completion of all graduation requirements.

Career Prospects

Graduates of the programme will possess the following qualifications and job/study opportunities:

1. Qualified Teacher Status (QTS) in Hong Kong;
2. Ability to work competently in a broad range of positions such as curators for art museums and galleries, administrators of arts organisations, researchers in cultural studies, musicians, and art educators; and
3. Eligibility to pursue local and overseas higher degree level programmes in education and creative arts disciplines.

* Students admitted into this programme are normally assigned a focus of study (i.e. primary or secondary level) by the end of their first year of study. The focus of study will be reflected in the arrangements for their Field Experience and adopted for the purpose of application for Qualified Teacher Status in Hong Kong upon graduation. This programme is designed to provide students with the disciplinary and professional competency to teach in both primary and secondary schools. However, recognition of Qualified Teaching Status (QTS) in primary or secondary schools in Hong Kong is subject to the decision of the Education Bureau (EDB). Graduates of this programme are required to approach the Teacher Registration Section of the EDB to submit applications directly and all applications will be assessed by the EDB.

ON Yan Yi (2021 Graduate)

"If you are looking for an artsy and musical adventure, the double degree programme puts you on the right track! The undergraduate programme not only offers you plenty of learning opportunities, but also gives you excellent support and insightful advice when you need it. The Department of Cultural and Creative Arts gives you an environment that is as free and culturally diverse as you can imagine. Its can-do spirit always encouraged me to step out of my comfort zone and participate in a wide range of activities. Participating in various schemes and activities connected me with many amazing alumni, fellow students, and even world-class artists which is helpful for my endeavours in creative arts and education. I particularly enjoyed joining the Student Pro-Artist Scheme, where I was mentored by Ms Sheryl Lee at Haw Par Music and had the opportunity to develop my musical skills. I am also grateful for the opportunity to participate in an exchange programme with Chung-Ang University in Seoul, where I worked closely with local film and theatre talent."

LAU Wing Shun (2022 Graduate)

"As I look back over the time at EdUHK, I appreciate the wide variety of subjects I studied, perspectives I acquired, as well as the many valuable opportunities offered to me at EdUHK. All these facilitated my progress as a performer and accompanist. I have joined the student-pro-artist scheme since Year 2, which has given me a chance to meet my mentor and piano teacher, and to participate in performances and masterclasses both in and outside EdUHK. To broaden my horizons in music, I have applied for the Choral, Chamber and Performance Award scholarships this year, which has allowed me to challenge myself in different aspects of music, like conducting chamber music."

I moved on to join the Modern Music Ensemble (MME) as its choir accompanist and leader. We overcame many difficulties caused by the pandemic to hold the MME annual concert. I witnessed the cohesion and unity among MME members, professors, other music groups and the entire music community of EdUHK. The close relationships with my classmates, peers and teachers are the most precious gifts I've received in my years at EdUHK."

CHEUNG Cho Shan (2021 Graduate)

"Before enrolling into the DD VA programme, I was confused about which career path to pursue. Studying for this programme, I have explored different areas relating to visual arts, like photography, ceramics and arts administration. The comprehensive teaching and learning resources at the University have facilitated my creative journey. The subject-based pedagogy with meaningful block-practice opportunities has been of great value to me. Throughout my studies, I had many opportunities to meet and learn from local and overseas professional artists, arts administrators and professors. This has equipped me well for my career.

Last summer, I had a memorable field experience, putting my classroom learning into practice at the Hong Kong Observatory. At the observatory, my meteorological knowledge was enhanced through the design of infographics, and the publication of educational videos and an e-book. I also learned how to make animations together with teammates from different universities. I relished the sense of accomplishment when our design and publication works were adopted. That was an invaluable experience in my university life!"

WONG Yuk Ching (2021 Graduate)

"The DD VA programme provides various experiential learning opportunities. The most impressive activity I participated in was an exchange programme in St. Petersburg, Russia. I spent a semester at the Peter the Great St. Petersburg Polytechnic University, studying drawing, animation and design. I participated in an immersion programme held by the Department of Cultural and Creative Arts, which was carried out in Seoul, Korea. Through the programme, I had lessons at Kyung Hee University and visited several artistic sites in Seoul. Those learning experiences enhanced my appreciation of different cultures and allowed me to develop my problem-solving and communication skills. They were fruitful journeys that enriched my international exposure and made my university life much more enjoyable."

Programme Aims

This programme is the first undergraduate programme in Hong Kong to offer arts management and cultural studies components to complement discipline-based training in the creative arts. It aims to develop community-based artists, who are able to work across a range of established art forms and contribute to the promotion and development of the arts and arts education in the local, regional and international cultural and creative industries.

Special Features

- Integrative and interdisciplinary approach
- Double benefit of subject-strength and community-based proficiency
- Study beyond borders
- Linking theory with practice by Student Experiential Learning
- Diversified graduation pathways

Career Prospects

Students are prepared for a wide range of careers in the cultural and creative industries, the commercial sector, the media, the government and non-governmental organisations. Graduates may choose to pursue a teaching career by completing an additional year of professional teacher training or undertake further studies locally or overseas.

AU Ho Yin (2022 Graduate)

"The BA(CAC) programme provided me with various opportunities to enrich my learning experiences, and encouraged me to step out of my comfort zone and explore different possibilities. My adventurous journey in the student exchange programme widened my horizons, broadened my knowledge and allowed me to understand the importance of cultural diversity, which also inspired my creativity and innovative mindset. The University also assists students' art creation through financial and technical support. During the four years of study in the BA(CAC) programme, I found my passion in life: ceramic art. I was subsidised to curate my first art exhibition with fellow classmates and participated in different art projects. These valuable experiences are beneficial to my personal and career development."

LEE Cho Yu (2022 Graduate)

"During my four years of study in the BA(CAC) programme, I have exposed myself to various art forms and developed my great passion for promoting Hong Kong arts. The programme allowed me to participate in different art activities, including an internship, community services, and education programmes. All these experiences guided me to explore the arts and cultural industry and connected the classroom theories to real-life experiences. My undergraduate experience influenced my decision to pursue a postgraduate programme that is related to the arts industry in Hong Kong. In the coming academic year, I will study for the Master of Arts in Cultural Management at The Chinese University of Hong Kong. I believe this can build up my knowledge on top of my previous experience and help me achieve my goals as a professional arts administrator."

Admissions Scheme

Programme Aims

The programme aims to:

- provide students with fundamental knowledge and skills in artificial intelligence and educational technology;
- develop students' ability in applying knowledge of artificial intelligence and educational technology appropriate to teaching and learning;
- build up students' skills in using appropriate methods of artificial intelligence and educational technology to approach and solve real-world problems in educational contexts; and
- equip students with the capacity to conduct and evaluate educational projects supported by ethical use of artificial intelligence and educational technology.

Special Features

A key feature of the programme is to provide students with the internship opportunity to work in relevant organisations, and experiential learning opportunities in collaboration with the organisations and institutions. Through the internship and experiential learning, students will gain real-world experience that enables them to put what they have learnt from the programme into action.

Career Prospects

This programme prepares graduates to be capable of taking up technical and support positions (e.g. computer programmer, data scientist, IT technician, software developer, e-learning resources designer, educational technology support, as well as teaching assistant in schools, publishing, community and social services, government and non-government organisations), with the possibility to progress further to senior positions like systems analyst and educational technology manager. Graduates can also pursue postgraduate study in the field of AI, education or information technology.

Programme Aims

The BSc(IEM) programme offers our next generation a multidisciplinary and comprehensive training encompassing science, computing, socioeconomic and regulatory dimensions, enabling graduates to deal with environmental issues from different perspectives.

The programme aims to provide students with a solid training in both scientific inquiry and social sciences inquiry so that they can understand the nature and complexity of the environmental challenges faced by the humanity. This also enables them to consider and tackle different environmental problems systematically using an evidence-based approach. Upon the completion of the programme, students will be able to apply professional knowledge to manage a broad range of environmental issues in the real world.

Special Features

In-depth Integrated Understanding

- Analyses pressing environmental sustainability challenges at the local, regional and international levels from scientific, regulatory, institutional and ethical perspectives.

Evidence-based & Communication-driven

- Develops sustainable solutions and recommendations based on prudent use of scientific evidence and conveys important messages related to environmental sustainability through quality communication.

Experiential Learning

- Enables students to apply their knowledge and skills through participating in the Internship, overseas field trip, experiential learning activities, and other community engagement activities.

Career Prospects

- Environmental Consultancy
- Non-government Environmental Organisations
- Public and Private Sectors in Environmental Management
- Environmental Testing

Programme Aims

The programme aims to prepare competent sports science and coaching professionals. It equips students with essential knowledge and technology in sports science, coaching, and performance with practical experience. The programme will also address the urgent community and market needs of improving personal performance and health by providing professional guidance and advice through active participation in physical activity, exercise, or sports.

Special Features

This programme transforms students into professional coaches through the following iconic features:

- The internship training opportunities in Hong Kong, the Greater Bay Area, and overseas sports organisations will provide an excellent chance for students to have a dialogue with sports leaders, build connections, enrich knowledge and skills, and lay a foundation for their future careers;
- Integration of the subject knowledge of sports science, coaching, technology, and life education provides comprehensive training, leading to a wide range of career paths; and
- Teaching cutting-edge knowledge by a professional team with leading roles in sports and life education allows students to keep ahead of peers and seize opportunities, striving for success and excellence in the academic field(s) and workplace.

Career Prospects

Students are prepared for a wide range of careers in the sports industries, including the commercial sector (e.g. sports coach, sports and recreation officer, occupational health & safety consultant, personal trainer, sports event manager, sports marketing consultant, etc.) and public sector (e.g. LCSD assistant leisure services manager, sports science officer, strength and conditioning coach, camp manager, etc.). Graduates may choose to pursue a teaching career by completing an additional year of professional teacher training (e.g. Postgraduate Diploma of Education (Physical Education)) or undertake further studies locally (e.g. Master of Social Sciences in Sports Coaching and Management offered by EdUHK) or overseas.

Field Visit

Programme Aims

The programme prepares young people with the skills and knowledge to create high-impact social careers, with a focus on the developmental needs in the Greater Bay Area (GBA) and emerging economies in Asia. Specifically, it aims to:

- provide students with a holistic experience of social entrepreneurship, taking students from ambition stages all the way to developing pitches for investors;
- enable students to build support among stakeholders and manage and grow social ventures to scale and maximise impacts;
- enhance students' understanding of the complex dynamics of social transitions in the GBA and comprehensive understanding of regional developments from a comparative perspective; and
- provide students with the academic and professional foundation to become professionals in social enterprises and government / non-government organisations, corporations; and local / national / international associations and organisations, and provide a strong foundation for career advancement and future postgraduate studies.

Special Features

Social entrepreneurship is one of the most important parts of the modern social economy. In a world that is rapidly changing, it is the social entrepreneurs who create the innovations for problems that are so complex and no easy solutions are available. Students will be equipped with practical organisational and entrepreneurial skills that are necessary for their future career. Meanwhile, students will benefit from rigorous training in development studies and the network they develop through internship and field visits with organisations in Hong Kong and other cities in the GBA.

Career Prospects

Through dedicated and practical training, the programme will prepare more young people who have the ambition to start a social venture, and grab the numerous funding opportunities that governments and businesses have offered. Graduates may also pursue an impactful career by joining existing social enterprises, government, socially responsible corporations, and NGOs as project or executive officers. In Hong Kong, social enterprises and non-governmental organisations have already provided approximately 80% of social services. These organisations often need to solicit resources from public or private sources, and communicate effectively with different stakeholders in society. Graduates will find ample employment opportunities.

Programme Aims

- To equip students with sociological perspectives to understand the transformations and developments of Hong Kong, China and the world;
- To enhance students' conceptual and problem-solving skills with a view to promoting personal growth and community sustainability;
- To develop students' competency in using appropriate research methodologies in social inquiries.

Special Features

Sociology-based

- Analyses the development of Hong Kong and the regional community with the use of appropriate sociological concepts and theories.

Community-driven

- Develops practical and sustainable plans for promoting the betterment of communities at local and regional levels.

Experiential Learning

- Enables students to apply their knowledge and skills through participating in internship.

Skills Development

- Devising community plans for promoting the quality of life of the disadvantaged groups and their families.
- Implementing research projects to ascertain community needs.
- Developing indicators for assessing community well-being.
- Developing family-friendly plans in different contexts.

Career Prospects

This programme will pay special attention to the fostering of portable skills and generic competencies that could be applied in a wide range of professional settings. The programme's emphasis on equipping students with a full range of research tools, both qualitative and quantitative, will benefit students' career development significantly. Its focus on a sociological perspective in community contexts will also ensure that much of what students learn here would have practical applications.

Graduates can find employment across a wide range of fields, including: community development workers, non-governmental organisation officers, community liaison officers in government departments and public organisations, international aid/development workers, public relations officers, social and marketing researchers, research assistants in academic institutions, and youth workers.

Practicum

Programme Aims

This is a degree completion programme which builds on the foundations of prior learning students have acquired in their Higher Diploma or Associate Degree in health/ health related disciplines. The programme aims to prepare students as train-the-trainer and knowledge skills to conduct health education to patient / clients in hospital and community settings. The programme also aims to prepare school teachers and school social workers to work closely with students in the provision of basic health education and behaviours to resist various attractions or health compromising behaviours. The programme promises to prepare health educators for effective health education in various settings.

Special Features

- An Elite Athlete Friendly Programme: 121 elite athletes were admitted since 2010/11 and 48 of them were graduated as of 2021/22;
- Provide overseas exchange opportunity for Full-time students;
- Integrate knowledge, theory and practice in providing health education in various train-the-trainer programmes in school and healthcare settings for a variety of clients including school children, teenagers, adults and patients in the community;
- Implement evidence-based health education practice;
- Evaluate contemporary health issues in healthcare; and
- Perceive and adapt to changes in the healthcare field in the global society; and in clients across the life course. Graduates should be able to think in innovative, creative ways to optimise health in civil society.

Career Prospects

Graduates of the programme will have a wide range of employment opportunities, and will be able to compete for administering and supervising positions. They will be qualified to work as health promotion officers in elderly centers, community health educators, wellness coordinators in outpatient departments / clinics, and so on.

Graduates may also wish to pursue further studies in nursing, sports, public health, education, therapy, social work or other related disciplines offered by local universities. At EdUHK, they will have the opportunity to do postgraduate study through a variety of Master's programmes. The University also offers Doctor of Education programme and PhD programme for doctoral study in the relevant specialties.

Remarks: Participants from Associate Degrees would be required to take three preparatory Additional Compulsory Courses (ACC), in order to assist them in meeting pre-requisites for the programme entry. Students who are required to take the ACC will have to complete a total of 69 cps in order to fulfill the graduation requirement of the programme (i.e. 60 cps for the programme and 9 cps for the ACC).

TING Wing Kit (2022 Graduate)

"Education is the keystone to optimising health in society. The BHE programme equipped me with integrated health-related knowledge, diversified educational practice, and research experience.

The programme offered a series of curricula ranging from mental health, nutrition to drug prevention. These courses are diverse in content, covering a wide variety of applicable theories. Moreover, plenty of opportunities were provided for practising in school and community settings. It allowed me to implement what I learnt, significantly reflect upon it, and consolidate my learning. These unique experiences have broadened my horizons in understanding how education could help to establish and develop an effective healthcare system.

The strong bonding between me and my teachers is precious and even more indelible than the knowledge I have acquired. For instance, they showed me genuine care when I was perplexed about my future, assisted me in clarifying my career goals, and prepared me for my future path. I have memorable and indispensable experiences in EdUHK. It is my sincere pleasure to complete my bachelor's degree here!"

LUI Wing Yin (Year 3 Student)

Elite Athlete Student

"The Education University of Hong Kong has offered me a precious opportunity to study my first undergraduate programme – Bachelor of Health Education (Honours) (BHE) – in my life. Since I became a retired athlete, I have worked as a School Sports Programme Coordinator at a secondary school.

The courses offered in BHE are very diversified, teaching us about the bad habits that may affect our health as well as other useful information in health education. I have learnt a lot from the courses through lectures, group discussions and assignments. What I studied in Foundation of Health Education and Health Education Practice was so meaningful, my teammates and I proposed a health plan for secondary school students to quit e-cigarettes.

BHE not only integrates my practical experiences with learning, but also allows me to effectively promote health in the community and campus."

Entrance Requirements (JUPAS)

Who To Apply

If you are applying the UGC-funded programmes on the strength of your HKDSE examination results, you should apply through JUPAS. JUPAS applicants are normally required to possess the following qualifications:

General Entrance Requirements

Remarks: The University adopts a holistic approach in student selection. During the selection process, the University will take into account applicants' interview performance, school reference reports, other learning experiences and/or achievements in non-academic areas such as Sports, Music, Community Service, Aesthetic and other cultural activities. Applicants who put our programmes as their Band A choices will be given higher priority for admission.

Entrance Requirements (Non-JUPAS)

Who To Apply

We welcome local and non-local applicants who are seeking admission on the strength of non-HKDSE qualifications to apply for our UGC-funded programmes via Non-JUPAS application route.

Applicants who possess the following qualifications are welcome to apply:

- Associate Degree or Higher Diploma students or graduates (including those who will obtain such a qualification[^] by August in the year in which admission is sought); or
- Non-local Qualifications[^]; or
- Transfer students who are currently enrolled in a Bachelor's degree or higher degree programme at a recognised local^{*} or non-local university; or
- HKALE Qualification; or
- Mature Applicants

[^] Normally, qualification which is of Level 4 or above under Qualifications Register (QR) of Hong Kong Council for Accreditation of Academic and Vocational Qualifications (HKCAAVQ).

[^] Applicants holding non-local post-secondary qualification may be required to provide a "Report for Qualifications Assessment" issued by the Hong Kong Council for Accreditation of Academic and Vocational Qualifications to support their applications. Block credit transfer will be granted to eligible applicants admitted to Year 1.

^{*} The following institutions (and the EdUHK) are UGC-funded institutions: City University of Hong Kong, Hong Kong Baptist University, Lingnan University, The Chinese University of Hong Kong, The Hong Kong Polytechnic University, The Hong Kong University of Science and Technology and The University of Hong Kong. However, inter-institutional transfers are not normally allowed except under exceptional circumstances.

Non-JUPAS

Non-Local

For general entrance requirements, please visit:

How To Apply

Applicants should apply through the Online Application System. To facilitate preliminary assessment, please upload all relevant academic qualifications (including updated transcript, language exam reports, etc.) to the application system once available.

Applications will be considered on a rolling basis which means the sooner you apply, the sooner your application will be assessed. Priority will be given to applications received by the main round application deadline. You are strongly advised to submit your application as early as possible.

Online Application System

Senior Year Admissions

The University has reserved a number of places for senior year admissions. Quality students holding recognised post-secondary qualifications or attending final year of a recognised sub-degree programme such as AD/HD or equivalent will be considered for senior year admissions with a view to minimising duplication of learning and promoting credit accumulation and transfer.

Those admitted via senior year admission route are expected to complete the programmes within 2 academic years. They are no longer entitled to apply for credit transfer of individual courses based on their entrance qualifications. To achieve the best learning outcomes, students admitted via senior year admission route may be required to study additional courses to meet the curriculum requirements. Necessary support will be given to ensure that they can cope with the additional workload during their studies.

The following programmes offer senior year admissions in 2023/24 entry:

UGC-Funded Programmes

Bachelor of Arts (Honours) in Creative Arts and Culture
Bachelor of Science (Honours) in Artificial Intelligence and Educational Technology
Bachelor of Science (Honours) in Integrated Environmental Management
Bachelor of Science (Honours) in Sports Science and Coaching
Bachelor of Social Sciences (Honours) in Social Entrepreneurship and Development Studies
Bachelor of Social Sciences (Honours) in Sociology and Community Studies

A number of Scholarship Schemes are available to encourage and recognise sub-degree **local** students who have outstanding academic performance to admit to our UGC-funded undergraduate programmes via senior year admission route.

EdUHK Self-Nomination Admissions Scheme

Who To Apply

The EdUHK Self-Nomination Admissions Scheme is designed for JUPAS applicants with exceptional potential and outstanding talent in music, sports, STEM or visual arts. Applicants can submit their self-nominations to the related JUPAS programmes of the University.

Applicants shortlisted by the respective subject departments will be interviewed in February or June. Students with excellent performance in the interview(s) will be given priority of admission, if deemed appropriate.

JUPAS programmes under the Self-Nomination Scheme:

Music Major

- Bachelor of Arts (Honours) in Creative Arts and Culture (Music) (JS8636)
- Bachelor of Arts (Honours) in Creative Arts and Culture and Bachelor of Education (Honours) (Music) (Co-terminal Double Degree) (JS8801)

Physical Education / Sports Related Major

- Bachelor of Education (Honours) (Physical Education) (JS8325)
- Bachelor of Science (Honours) in Sports Science and Coaching (JS8726)

STEM Related Major

- Bachelor of Education (Honours) (Primary) - Mathematics (JS8246)
- Bachelor of Education (Honours) (Secondary) - Information and Communication Technology (JS8361)
- Bachelor of Education (Honours) (Science) (JS8430)
- Bachelor of Science (Honours) in Integrated Environmental Management (JS8702)
- Bachelor of Science (Honours) in Artificial Intelligence and Educational Technology (JS8714)

Visual Arts Major

- Bachelor of Arts (Honours) in Creative Arts and Culture (Visual Arts) (JS8648)
- Bachelor of Arts (Honours) in Creative Arts and Culture and Bachelor of Education (Honours) (Visual Arts) (Co-terminal Double Degree) (JS8813)

Nomination Methods

Please read through the nomination criteria of the respective programmes and complete the online form(s) according to the instructions. Before submitting application(s), please make sure that:

1. You have put the respective JUPAS programme(s) as your Band A choice(s); and
2. You have prepared and uploaded ALL relevant supporting documents in ONE PDF file (maximum of 15MB) including
 - Proof(s) of the achievements in music / sports / STEM / visual arts;
 - A personal statement; and
 - Recommendation letter(s) from relevant clubs/associations/schools.

For further details, please visit:

Fees & Student Services

Fees

	Local Students	Non-Local Students*
Government-funded Programmes		
Undergraduate	HK\$42,100 per annum	HK\$140,000 per annum
Self-financed Programmes		
Bachelor of Health Education (Honours)	HK\$196,000 (whole programme)	

* Please refer to www.eduhk.hk/acadprog/nonlocal/ for the definition of non-local students.

For further details, please visit:

www.apply.eduhk.hk/ug/fees

Scholarships

Scholarships have been established to encourage the pursuit of academic excellence and to recognise students' academic achievement. Set up by funding from the University and donations from various organisations and civic-minded individuals, these scholarships are granted on the basis of academic merit, personal qualities and contribution to the community, amongst other factors.

For further details, please visit:

www.apply.eduhk.hk/ug/scholarships

Accommodation

Hall life gives student-residents an opportunity to develop life skills through self-management, learning the art of negotiation and the value of independence. From 2011/12, all first-year full-time Government-funded undergraduate students are offered with guaranteed hall residency for 2 semesters, one of which to be taken up during the first year of study. Other Government-funded students may apply for student accommodation under the Hall Point System.

For further details, please visit:

www.apply.eduhk.hk/ug/accommodation

○ All Bachelor of Education and Double Degree Programmes

EdUHK is one of the teacher education providers in Hong Kong. Graduates of the University's teacher education programmes are eligible to apply to become fully qualified and registered teachers. As regards teacher registration, graduates should approach the Teacher Registration Team of the Education Bureau (EDB) to submit applications directly. All applications will be assessed by the EDB which will consider, among other things, whether an applicant has been convicted of any criminal offence (including sex-related offence) in Hong Kong or elsewhere, or is involved in any ongoing criminal proceedings or investigations.

○ All Bachelor of Education, Double Degree, Bachelor of Arts, Bachelor of Science Programmes (Year 1 Admissions only), and Bachelor of Social Sciences (Honours) in Sociology and Community Studies (Senior Year Admissions)

Students admitted into this programme starting from the 2023/24 cohort are required to visit the Greater Bay Area (GBA) for a short trip (e.g. 1-day or 2-day 1-night trip) in order to complete the Cross-Faculty Core Course. While the GBA trip is heavily subsidised, students are still required to contribute 18% of the estimated cost of the trip ("student contribution"), whereas personal entertainment, meals expenses, travel document fee and personal insurance costs will not be supported. The estimated cost of the GBA trip for students admitted to the 2023/24 cohort is not available yet as it is subject to a variety of factors such as changes to the cost of the GBA trip as a result of inflation, trip duration, traveling expenses, the exchange rate, etc. The exact amount of student contribution is thus not available.

○ Bachelor of Education (Honours) (Geography), Bachelor of Arts (Honours) in Creative Arts and Culture, Bachelor of Science (Honours) in Integrated Environmental Management (Year 1 Admissions), and Bachelor of Social Sciences (Honours) in Social Entrepreneurship and Development Studies (Senior Year Admissions)

Students admitted into this programme are required to join the non-local field visit / trip and contribute no less than 18% of the estimated cost of the activity in order to complete the programme.
