

THE EDUCATION UNIVERSITY OF HONG KONG

Course Outline

Part I

Programme Title	:	Doctor of Education (EdD)
Programme QF Level	:	7
Course Title	:	Advanced Research Methodology for Health
Course Code	:	HCS7002
Department	:	Health and Physical Education
Credit Points	:	3
Contact Hours	:	39 (Directed Study option)
Pre-requisite(s)	:	Nil
Medium of Instruction	:	English
Course Level	:	7

Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Undergraduate, Taught Postgraduate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

1. Problem Solving Skills
2. Critical Thinking Skills
3. Creative Thinking Skills
- 4a. Oral Communication Skills

- 4b. Written Communication Skills
5. Social Interaction Skills
6. Ethical Decision Making
7. Global Perspectives

1. Course Synopsis

This advanced level course is designed to introduce students to the principles and methodologies commonly used in the area of medical and health research. On completion of the course, students will have a firm understanding of most quantitative and qualitative research methods including their strengths and weaknesses, the appropriate analytical approach for data analysis in accordance with the research design, and the interpretation of results obtained from these research designs. Moreover, students will be introduced to some of the more recent advanced research methods as a way to formulate the design of a study.

2. Course Intended Learning Outcomes (CILOs)

Upon completion of this course, students will be able to:

- CILO₁ examine the concept and the principle methodologies commonly used in medical and health research in detail;
- CILO₂ critically evaluate the strengths and weaknesses of each type of research methods, both quantitative and qualitative;
- CILO₃ examine the appropriate statistical and analytical approaches for data collection using different types of research methodologies, and critically evaluate the proper interpretation of results obtained from the analysis;
- CILO₄ critically evaluate some of the advanced methods recently developed for uncommon medical and health research.

3. Content, CILOs and Teaching & Learning Activities

Course Content	CILOs	Suggested Teaching & Learning Activities
Principles of research methodologies developed for medical and health studies	CILO ₁	Tutorials, Case study, Discussion with supervisor
In depth analysis of each type of research method for their strengths and weaknesses	CILO ₂	

Advanced and statistical analytical approaches for each type of research design and the interpretation of results obtained from the analysis	<i>CILO</i> _{1,2,3}	
Examination of recently developed advanced methods for medical and health research	<i>CILO</i> _{1,2,3,4}	

4. Assessment

Assessment Tasks	Weighting (%)	CILO
(a) Tutorials: Students are required to have tutorials with the supervisor on various topics covering the contents of the course.	10%	<i>CILO</i> ₁₋₄
(b) Reflections: Students are required to have tutorials with the supervisor on various topics covering the contents of the course. At the end of each, they are required to provide a reflection on the topic based on the readings and discussions.	40%	<i>CILO</i> ₁₋₄
(c) Essay: Students are required to submit a proposal on the design of a study with full details.	50%	<i>CILO</i> ₁₋₄

5. Required Text(s)

Webb, P., Bain, C., & Pirozzo S. (2017) *Essential epidemiology: An introduction for students and health professionals* (3rd ed.). UK: Cambridge University Press.

6. Recommended Readings

Hesse-Biber, S.N. & Johnson, R.B. (Eds). (2015). *The Oxford Handbook of Multimethod and Mixed Methods Research Inquiry*. OUP: Oxford.

Keyes, K.M., & Galea, S. (2014). *Epidemiology matters: A new introduction to methodological foundations* (1st ed.).

Portney, L.G., & Watkins, M.P. (2015). *Foundations of clinical research: Applications to practice* (3rd ed.). New Jersey: Prentice Hall. Oxford: Oxford University Press.
