

THE EDUCATION UNIVERSITY OF HONG KONG

Course Outline

Part I

Programme Title	: Doctor of Education (Mathematics Education – Directed Study)
Course Title	: MATH 3 – Research on ICT in Mathematics Education
Course Code	: MTH8124
Department	: Mathematics and Information Technology
Credit Points	: 3
Course Hours	: 39 hours
Pre-requisite(s)	: MATH 1 and MATH 2
Level	: Applied Stage

Part II

1. Synopsis

This course aims to give candidates an overview of the current research in the use of ICT (Information and Communication Technology) in the teaching and learning of mathematics from an international perspective. Epistemological theories (e.g. semiotic mediation, instrumental genesis, variation, etc.) will be visited to provide an opportunity to critically reflect upon major issues exploring the pedagogical potentials of ICT. The roles of ICT environments in mathematics education like Dynamic Geometry, Spreadsheet, CAS (Computer Algebra System), and Graphing Tools will be explored. The focus is on empowering teaching and learning of mathematics in an ICT-rich environment that promotes change in classroom practices and design of mathematically meaningful tasks.

2. Course Intended Learning Outcomes (CILOs)

Upon completion of this course, students will be able to:

- CILO₁ Develop a critical understanding and knowledge to articulate emergent philosophies and key principles for integrating ICT into the mathematics classroom;
- CILO₂ Synthesize ideas from a critical analysis of specific ICT educational environments for the effectiveness in promoting teaching and learning of school mathematics;
- CILO₃ Demonstrate the ability to use an understanding of the development of mathematical concepts and of pedagogical issues when undertaking research on ICT in mathematics education;
- CILO₄ Critically analyze the roles and responsibilities of teachers and students in ICT-rich environments by examining current research with reference to literature.

3. Content, CILOs and Teaching & Learning Activities

Course Content	CILOs	Suggested Teaching & Learning Activities
Learning processes with technology, impact of technology on the teaching and learning of mathematics	<i>CILO</i> _{1,2,3,4}	<ul style="list-style-type: none"> ▪ Lecturer-led Q&A ▪ Guided Research Activities
Research and development on specific ICT environments like dynamic geometry environments	<i>CILO</i> _{1,2,3,4}	<ul style="list-style-type: none"> ▪ Lecturer-led Q&A ▪ Guided Research Activities
Issues related to the use of ICT as a pedagogical tool: curriculum, assessment, teacher conceptions, change in classroom practice, etc.	<i>CILO</i> _{1,2,3,4}	<ul style="list-style-type: none"> ▪ Lecturer-led Q&A ▪ Guided Research Activities
ICT task designs relate to the epistemological and cognitive aspects of the teaching and learning of mathematics	<i>CILO</i> _{1,2,3,4}	<ul style="list-style-type: none"> ▪ Lecturer-led Q&A ▪ Guided Research Activities

4. Assessment

Assessment Tasks	Weighting (%)	CILO
(a) A presentation on the articulation of self-selected readings and on possible future research directions	20	<i>CILO</i> _{1,2,3,4}
(b) An analytical and critical essay of around 4000 words on one of the topics in the Content Themes	80	<i>CILO</i> _{1,2,3,4}

5. Required Text(s)

Nil
