What is this talk about?

Over the last 20 years, there is a gradual and constant shift from classical psychology to cognition and neuroscience in psychology departments in Israel. What does it hold to classical psychology? How will this affect the discipline? Is there a future to classical psychology?

About the speaker:

Prof. Menachem Ben-Ezra is a full Professor of Psychology in the School of Social Work at Ariel University in Israel. He has over 190 scientific publications and was a consultant to the International Atomic Energy Agency (IAEA) – Human health division. In addition, he is the former President of the Stress and Anxiety Research Society (STAR) and currently a member of the International Trauma Consortium.
