NEW YORK daily news 29 Sep 2016

The test for the city's elite high schools will be more in sync with classroom work as part of a \$13.4 million contract approved Wednesday night by the city's Panel for Educational Policy.

The Pearson firm was awarded the six-year contract to create the Specialized High School Admissions Test, the exam required to attend top city schools including Stuyvesant High School and the Bronx High School of Science.

Educators believe aligning the test with the Common Core curriculum taught in classrooms might also help diversify the student body in the specialized high schools, where only 11% of the teens are black or Latino.

Critics have long charged students who can afford tutors and other test prep have an advantage getting into the top high schools because the exam's content sometimes veers outside the city's classroom curriculum.

"It's not going to get easier. It's not going to be a replication of the state exams," Laura Zingmond, who represents Manhattan on the panel, said before voting to approve the contract. "It hasn't been revised in 30 years. It's worth, after 30 years, rethinking it."

Schools Chancellor Carmen Fariña, who also attended the meeting at Murry Bergtraum High School in Manhattan, said there is no effort to make the exam less rigorous.

"I do think this is a good first step," she said.
