

# Adobe's solutions on virtual classroom & rich teaching material production

05 Mar 2008 (Wednesday) 14:30pm-17:00pm at C-LP-01

## Sharing Knowledge

## Learning Evaluation

### Objective

1. Using real examples to demonstrate skills to transform existing teaching materials into online interactive teaching materials and,
2. Analyze how virtual classroom help to promote learning interest and self-learning skills of students.

### Program Description

1. Show how interactive materials help students in learning, sharing knowledge and learning evaluation.
2. Introduction of rich teaching material generator - **Adobe Presenter 6** & **Adobe Captivate 3**.
3. Integration of existing materials such as PowerPoint slides, Movie ... etc
4. Introduce the functions and demonstrate user-friendly skills of using the virtual classroom platform -- **Adobe Acrobat Connect**.
5. Analyze how those tools help to improve students' learning performance and self-learning skills.
6. Share successful cases of local students using Adobe's solutions to study.

### Expectation after Workshop

Teachers are able to apply the skills in making rich teaching materials and understand how the virtual classroom technology helps to increase efficiency in teaching and learning.
