

About Fever

Q1. : What can I do if I have a fever out of clinic hours but don't feel sick enough to go to my local hospital?

A. : Fever is not a diagnosis but simply a symptom of usually an infection. You may take over the counter medicine like paracetamol if you have no allergies to it. Follow instructions as per manufacturer in the package. Drink lots of water, avoid alcohol, wear a mask and avoid crowded places, and then make an appointment to see your doctor as soon as possible.
