Pre-requisite(s)	: Nil
Medium of Instruction	: English
Course Level	: 6

Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing participants with important graduate attributes.

In gist, the Graduate Attributes for Undergraduate, Taught Postgraduate and Research Postgraduate participants consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of participants in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

1. Problem Solving Skills
2. Critical Thinking Skills
3. Creative Thinking Skills
- 4a. Oral Communication Skills
- 4b. Written Communication Skills
5. Social Interaction Skills
6. Ethical Decision Making
7. Global Perspectives

1. Course Synopsis

This course reviews essential financial technology (FinTech). Participants are provided with opportunity in exploring the emergence of new business models in various areas of banking, insurance and wealth management. The course is focusing on how the technological advance in data and analytics are enabling the financial sector innovations. A special attention will be devoted to BlockChain, the ‘internet of finance’ and its potential of further transforming the sector. In dealing with the increasing security and privacy concerns, operational risks as well as social challenges that emerged as part of the FinTech transformation are also covered in the course. Participants are expected to understand and describe recent Fintech developments and analyze their impacts on the financial services sector.

2. Course Intended Learning Outcomes (CILOs)

Upon completion of this course, participants will be able to:

- CILO₁ critically review of essential FinTech in the areas of banking, insurance and wealth management
- CILO₂ in-depth discussion on the innovations in financial sector enabled by technological advance in data and analytics
- CILO₃ explore and generalize the influence of BlockChain on the development and transformation of financial services sector
- CILO₄ evaluate on security and privacy concerns, operational risks as well as social challenges on FinTech transformation
- CILO₅ analyse and project the trends in Fintech developments and their impacts on the financial services sector

3. Content, CILOs and Teaching & Learning Activities

Course Content	CILOs	Suggested Teaching & Learning Activities
Introduction to FinTech: <ul style="list-style-type: none">● What is FinTech?● What are the market conditions for FinTech to develop?● Who are the FinTech players?● What are the potential impacts of FinTech on society?	CILO _{1,2,4,5}	Lecture, group discussion, case studies, online search for current information
