#### Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Undergraduate, Taught Postgraduate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

1. Problem Solving Skills
2. Critical Thinking Skills
3. Creative Thinking Skills
- 4a. Oral Communication Skills
- 4b. Written Communication Skills
5. Social Interaction Skills
6. Ethical Decision Making

## 7. Global Perspectives

### 1. Course Synopsis

This course offers an overview of the field of global political economy (GPE) and provides a disciplinary foundation for students to engage in further inquiries in global studies. It introduces the historical context of contemporary international political economy and the different theoretical approaches and perspectives of GPE before turning to the key issue areas, including trade, production, investment, finance, development, and resources. It transcends the divide between international and domestic levels of analysis, and analyses the roles of actors like interest groups, multinational corporations, governments, and international institutions in the evolutions of global/regional trade regimes, production and investment networks, and development institutions. It also explores the relationships between state power and globalization and possible future developments.

### 2. Course Intended Learning Outcomes (CILOs)

*Upon completion of this course, students will be able to:*

- CILO<sub>1</sub> analyze issues of international political economy from different theoretical perspectives;
- CILO<sub>2</sub> understand the interplays between the international and domestic political economic forces in different issue areas (such as trade, development and resources);
- CILO<sub>3</sub> assess the aims and performance of key global trade and financial institutions;
- CILO<sub>4</sub> conceptualize various aspects of globalization and their social, economic and environmental implications.
