Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Sub-degree, Undergraduate, Taught Postgraduate, Professional Doctorate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

1. Problem Solving Skills
2. Critical Thinking Skills
3. Creative Thinking Skills
- 4a. Oral Communication Skills
- 4b. Written Communication Skills
5. Social Interaction Skills
6. Ethical Decision Making
7. Global Perspectives

1. Course Synopsis

The aim of Student Internship is to help students integrate and apply in a real-life setting the knowledge and skills they have gained in earlier stages of the programme. As an important learning experience, students will be expected to make use of the conceptual perspectives and methodological skills they have learned in classes in a real-world local or community setting. Interaction between conceptual ideas and practical problems offers students an opportunity to suggest and to try out novel solutions engendered by the conceptual insights they can grasp in addressing community issues. At the same time, limits of a typical local work setting may make them rethink the strength and applicability of the ideas and skills they have acquired. Moreover, the Internship provides practical experience of the challenges faced in both public and private sector workplaces and will assist students in making decisions regarding their career path.

(Remarks: there are six major sectors of internship organizations to which student will be assigned, including community development, social service, education, entrepreneurship, executive management and research).

2. Course Intended Learning Outcomes (CILOs)

Upon completion of this course, students will be able to:

- CILO₁ Demonstrate enhanced understanding of the value of sociological perspectives in understanding and tackling community issues through practical experiences;
- CILO₂ Apply the methodological skills acquired in the programme (including quantitative and qualitative research, problem solving, and other generic skills) to real-world work environments;
- CILO₃ Demonstrate ability to analyze and think critically about experiences gained during Internship in relation to programme coursework;
- CILO₄ Develop effective communication and problem-solving skills through interacting and collaborating with co-workers;
- CILO₅ Demonstrate competence and commitment in work-related contexts.
