#### Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Sub-degree, Undergraduate, Taught Postgraduate, Professional Doctorate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

1. Problem Solving Skills
2. Critical Thinking Skills
3. Creative Thinking Skills
- 4a. Oral Communication Skills
- 4b. Written Communication Skills
5. Social Interaction Skills
6. Ethical Decision Making
7. Global Perspectives

## 1. Course Synopsis

This induction course aims to lay a foundation for students in sociological reasoning and its unique perspective into social life. The course also serves as platform for mentoring and academic advising in the programme for students who are new to the demands of academic teaching and learning at the university level and help them embrace various challenges ahead. The course has five objectives. Firstly, it helps students to “discover” the distinctive approaches and conceptual tools in the “sociological imagination” and its relation to various strands of community studies. Secondly, it develops students’ core competencies for university education, such as skills in oral and written communication, analytical reading, personal planning and reflective thinking. Thirdly, it prepares students to address issues in relation to academic integrity – plagiarism, absenteeism and free-riding – arising in the new learning environment. Fourthly, aligning with the new graduate attributes, it should help students reflect on their civic responsibilities as a member of our community as well as opportunities for community services and innovation. Lastly, through regular, formal and informal group meetings, it aims to build supportive clusters between the students and the course instructor who also serves as the academic mentor, and also among the students themselves, reinforcing the existing academic advising system in the programme and university level.

## 2. Course Intended Learning Outcomes (CILOs)
