Pre-requisite(s) : Nil
Medium of Instruction : English

Course Level : 4

Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Sub-degree, Undergraduate, Taught Postgraduate, Professional Doctorate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

- 1. Problem Solving Skills
- 2. Critical Thinking Skills
- 3. Creative Thinking Skills
- 4a. Oral Communication Skills
- 4b. Written Communication Skills
- 5. Social Interaction Skills
- 6. Ethical Decision Making
- 7. Global Perspectives

1. Course Synopsis

This course shall equip students with knowledge, concepts, analytical skills and positive attitudes on understanding the nature and complexities of digital communities in the information age. It shall help students to understand problems, issues and challenges facing digital communities in both communal and global contexts. Key concepts such as digitalization, digital communities, digital society, digital works, privacy, online relationships, digital media, digital divide, digital world, and digital citizenship, etc. will be introduced. Empirical case study will be chosen about digital and social transformations of Hong Kong in Greater Bay Area for students to apply their knowledge and examine the interactions between theories and realities. In particular, group discussions, small group analysis, tutorials, and guest lectures shall allow students to apply their learning skills in understanding different digital communal contexts. Lastly, this course shall also help students acquire transferrable and analytical skills through learning activities for their future personal and career development.

2. Course Intended Learning Outcomes (CILO_s)

Upon completion of this course, students will be able to:

- CILO₁ Develop an understanding of the nature, meanings and complexities of digital communities in an information world;
- CILO₂ Identify the key knowledge and concepts such as digitalization, digital communities, digital society, digital world, digital divide, privacy, online relationships, digital works, digital media, and digital citizenship, etc;
- CILO₃ Apply the appropriate concepts and theories in analyzing problems, issues and challenges facing digital communities by using transferrable and analytical skills;
- CILO₄ Explore possible responses by reflective thinking and cultivate positive, open-mindedness, and engaging attitude in facing an information world.

3. Content, CILOs and Teaching & Learning Activities
