Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Sub-degree, Undergraduate, Taught Postgraduate, Professional Doctorate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

1. Problem Solving Skills
2. Critical Thinking Skills
3. Creative Thinking Skills
- 4a. Oral Communication Skills
- 4b. Written Communication Skills
5. Social Interaction Skills
6. Ethical Decision Making
7. Global Perspectives

1. Course Synopsis

Have you ever puzzled why your schools, classrooms and curriculum look like the way they are? While education is a universal experience for almost everyone in the modern world, it is also a complex social process influenced by, and itself shapes, the broader society. In this course we will examine the relationships among the primary actors within schools, namely students and their peers, teachers, parents, and administrators, as well as the impact of multiple stakeholders in the society and community. The sociological perspective offers a unique perspective in understanding how schools are being run, how and what students learn, why there are persistent differences in how well students do, and what purposes are being served by the schooling process at different times and places. We also pay particular attention to the diverse backgrounds and needs of individual students, their families, their schools and teachers, as well as the changes and challenges arising in the local, national and global contexts in which they found themselves in. Together we will reflect on how education makes all of us, and how we construct the education process collectively.

2. Course Intended Learning Outcomes (CILOs)

Upon completion of this course, students will be able to:

- CILO₁ Demonstrate knowledge of the key concepts, theories, and important topics in sociological analysis of education;
- CILO₂ Deepen the understanding of the impacts of social and community context and social structure upon the process of schooling and critically evaluate the transformative power of education in generating social changes;
- CILO₃ Reflect critically upon the educational experiences of students from a variety of socio-cultural backgrounds and the reform of schooling practices in promoting social justice in education; and
- CILO₄ Develop the ability to undertake independent research to analyze educational issues from a sociological perspective.
