1. Course Synopsis

Social protection has been a mounting challenge for many governments in Asia and the world. Population aging and frequent economic crises, along with rising income inequality and poverty are posing unprecedented threats to governments as well as families. Globalization has a further impact on social, economic and political developments of societies in Asia, which generate substantial policy implications. The course will discuss the root causes of these problems and more importantly, examine the different approaches to protecting the population from income insecurities. Adopting a comparative approach, this course will enable students to understand the design and implications of the major social protection programmes in the Asian region.
