Course Outline

Part I

Programme Title	: Bachelor of Education (Honours) (Geography) (Five-year Full-time)
Programme QF Level	: 5
Course Title	: Spatial Data Analysis and GIS
Course Code	: GGP2020
Department	: Social Sciences and Policy Studies
Credit Points	: 3
Contact Hours	: 39
Pre-requisite(s)	: Nil
Medium of Instruction	: English
Course Level	: 2

_____

Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Sub-degree, Undergraduate, Taught Postgraduate, Professional Doctorate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):
- **P**rofessional **E**xcellence;
- **E**thical **R**esponsibility; **&**
- **I**nnovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:
1. Problem Solving Skills
2. Critical Thinking Skills
3. Creative Thinking Skills
4a. Oral Communication Skills
4b. Written Communication Skills
5. Social Interaction Skills
6. Ethical Decision Making
7. Global Perspectives

1. **Course Synopsis**
   This course provides students with the knowledge of spatial data analysis and skills in using GIS software to conduct geographical data analysis. This is an independent course which can be taken by students from various disciplines and is also beneficial to students with a general interest in the spatial analysis of geographical or environmental data.

2. **Course Intended Learning Outcomes** (CILOs)
   Upon completion of this course, students will be able to:

   CILO$_1$:   analyze spatial data and provide cartography visualization.

   CILO$_2$:   identify the use of geographic information system (GIS) in different areas such as presentation of detailed data, environmental issues, road networks, utilities, property records, and community facilities.

   CILO$_3$:   apply different kinds of data collection methods including digitizing maps, scanning, photo interpretation, and remote sensing to capture measurement data.

   CILO$_4$:   evaluate the data quality and to organize appropriate storage and indexing.

   CILO$_5$:   recognize the role played by GIS and spatial data analysis in geography teaching.

3. **Content, CILOs and Teaching & Learning Activities**

Course Content	CILOs	Suggested Teaching & Learning Activities
1. Introduction to Spatial Analysis a) Classification and reclassification b) Spatial measurement, aggregation, overlays c) Spatial filtering spatial interpolation d) Digital terrain model e) Network analysis	*CILO$_1$*	• Lectures • Classroom discussions • Tutorials or workshops
2. Map reading, design and interpretation a) Principle of map making b) Design consideration c) Reading and interpretation skills d) Word processing, IT and graphics	*CILO$_{2,3}$*	• Lectures • Classroom discussions • Tutorials or workshops
3. Introduction to GIS a) Definition and components of GIS b) Georeferencing system c) GIS functions and limitations	*CILO$_2$*	• Lectures • Classroom discussions • Tutorials or workshops

	Course Content	CILOs	Suggested Teaching & Learning Activities
4.	**GIS data and collection method**	$CILO_{2,3}$	• Lectures
a)	Vector and raster data		• Classroom discussions
b)	Spatial data modeling		• Tutorials or workshops
c)	Remote sensing		
d)	Field survey		
e)	Data quality and transforming		
f)	Cartographic instrument		
5.	**GIS Project and Database Management**	$CILO_{2,4}$	• Lectures
a)	GIS database design		• Classroom discussions
b)	Data entities		• Tutorials or workshops
c)	GIS project design and implementation		
6.	**Application of statistical data processing in GIS**	$CILO_{3,4}$	• Lectures
a)	Attribute operations		• Classroom discussions
b)	Statistics package		• Tutorials or workshops
7.	**Application of GIS on geography teaching**	$CILO_5$	• Lectures
			• Classroom discussions
			• Tutorials or workshops

4. **Assessment**

	Assessment Tasks	Weighting (%)	CILOs
(a)	**Exercises** Exercises assessing students' understanding of technical skills about GIS applications.	40%	$CILO_{1,\,2}$
(b)	**Group project report** Written report evaluating students' practical skills such as designing GIS analysis model, collecting GIS data sets, carrying out the planned analysis and providing cartography visualization.	30%	$CILO_{1,2,3,4,5}$

(c)	**Examination** A two-hour written examination comprising of various format of questions aiming to assess different levels of knowledge such as analytical skills of cases, basic concepts and data models.	30%	*CILO$_{1,2,3,4}$*

5. Required Text(s)

9. **Academic Honesty**
   The University upholds the principles of honesty in all areas of academic work. We expect our students to carry out all academic activities honestly and in good faith. Please refer to the *Policy on Academic Honesty, Responsibility and Integrity* (https://www.eduhk.hk/re/uploads/docs/00000000016336798924548BbN5). Students should familiarize themselves with the Policy.

10. **Others**
    Newspaper articles and other media reports, including contemporaneous reporting, related to the course; recent related reports from scientific organizations and nongovernmental organizations; new video media and websites.
